How to Measure
Assembled Patio Sliding Screen Door

RITESCREEN

Will this door screen fit?

The Assembled Patio Sliding Screen Door is compatible with 95% of door frames with roller tracks in the USA. Using Adjustable Fit Technology, the expandable frame enables easy installation in openings from **78" to 81"** tall.

Measuring Width:

1) Measure your doorway or an existing door screen from left to right.
2) For the best fit, it should measure approximately **30 or 36 inches** wide.
3) This is the width you will order.

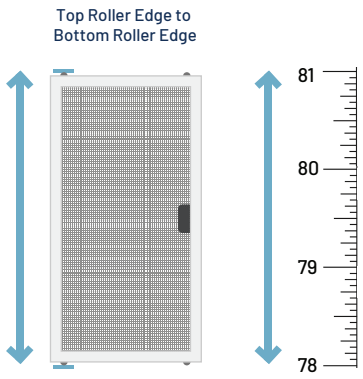

30" or 36"

Measuring Height:

1) Measure your doorway from top to bottom or an existing door screen from the top roller edge to the bottom roller edge.
2) If the measurements are between **78 and 81 inches**, our Assembled Patio Sliding Screen Door will fit.

Between 78" - 81"
