

PRODUCT SPECIFICATIONS

- * This kit comes with roller screws compatible with door thickness of 1/2" to 1 1/4".
- * Mini Classic Design rollers gives the lowest clearance from the top of the door to the ceiling measuring only 4". That's all you need!
- * This hardware kit comes with everything you need like anti jump pads, floor guides, door stoppers, lag bolts, roller screws all you need to mount the track to the wall and the door to the sliding hardware except for doors. You don't have to look elsewhere for extra pieces to put a sliding door together. Doors are not included.
- * Tracks 24in, 30in, 36in, 42in, 48in, 60in, is one peice track with American Standard Spacing of 16in. Tracks not listed come with two or three pieces using a junction plate to connect, therefore the spacing between the two holes where the tracks connect may not be 16in.
- *Our rollers are made out of strong Nylon specifically designed for a quiet rolling system.
- *Material is made for indoor & outdoor use. We usually recommend to spray Rustoleum for longer lasting usage when installing outdoors.
- *This hardware can hold up to 50lbs total door(s) weight used per kit.
- *Installation will be provided with ONLY 8-STEP easy to follow instructions in the box.
