

VanZyverden's
GLADIOLUS LARGE FLOWERING ENDLESS SUMMER MIXTURE

Gladiolus bulbs are a summer blooming classic with blooms available in basically any color imaginable. Orchid-like blooms appear on flower stalks above sword-shaped leaves. Gladiolus are a favorite in summer garden beds and borders and are a great addition to cutting gardens.

Great for cut flower arrangements

*Grows well in containers, borders,
rock gardens & mass plantings*

*Adds a colorful vertical element to
summer gardens*

About This Variety: As this is a true Gladiolus mixture, no two packs are exactly the same. Purchase several packs to plant in mass sweeps and collect as many varieties as possible. The mixture is a bit like a box of chocolates, as you never know what you are going to get.

Growing Instructions: Plant Gladiolus in the spring after all danger of frost has passed. Plant in a full sun to partially shaded location. Gladiolus loves soil that is rich, porous and drains well but still holds enough water for the roots. If your soil is heavy clay and drains slowly, or very sandy and does not hold water, add organic soil amendments like peat moss or ground bark. Spread a 3-4 inch layer of soil amendment if needed, add fertilizer and incorporate into the soil to a depth of 10 inches. Plant in groups with corms spaced 4-6" apart for the best show. Gladiolus corms should be planted 4-6" deep. Water thoroughly at planting. Water regularly while growing and in bloom so that water will reach the roots. Mulch to keep the soil cool and to prevent the soil from drying out. After planting, fertilize sparingly on top of ground with any good plant food. A repeat application should be made in summer. Must be staked if planted in windy areas. After blooming, let corms grow until plants have turned brown or until danger of frost. Dig, dry, clean and store in a dry, cool place at 40-50°F to over winter.

Care Tip: Plant Gladiolus corms in groups of 10 or more for a dramatic garden display. Soil should be kept moist during dry periods.

Blooms: Summer

Exposure: Full Sun to Partial Shade

Height: Grows 48-60"

Spacing: Plant 4-6" apart, 4-6" deep

USDA Zones: Hardy in USDA zones 7-10

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
