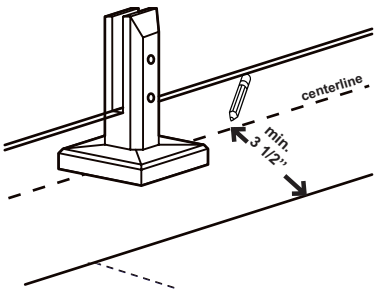
This model is fully reversible. The right wall installation is shown in the following installation steps. For left wall installation, simply reverse the orientation of your installation and begin on the opposite wall.

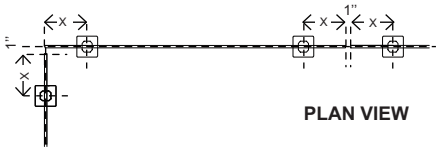
STEP 1 MARKING THE CENTERLINE



Mark the railing centerline across the entire span, ensuring it is positioned 3 inches from the outer edge of the deck, concrete, or structure. For multiple sections, accurately mark the centerlines of each span to ensure proper alignment and a smooth installation process.

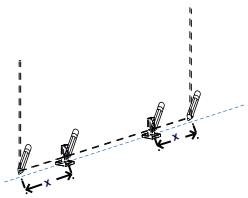
Use a string line or a chalk line to mark your centerline.

STEP 2 MARKING THE SPIGOT & GLASS



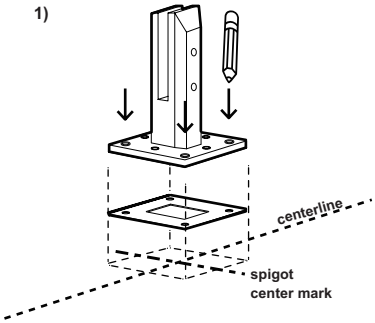
X = 25% of the length of the glass panel

Use your plan to identify the position of each glass panel. Mark the starting and finishing points of each glass panel along the railing centerline, ensuring proper gaps between each pane of around 1" (3/8" to 1-1/4" ok). The center of the spigot should be at 25% of the glass panel width from each side.



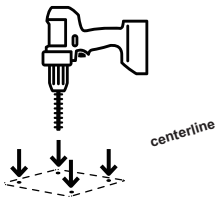
STEP 3 INSTALLING THE SPIGOT

1)



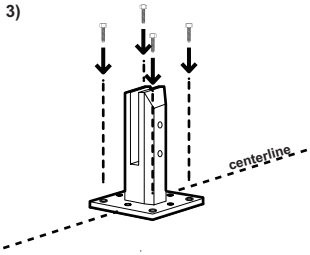
1) Place the spigot on top of the adjustment plate. Align the spigot along the railing centerline and its respective reference mark. Mark with a pencil

2)



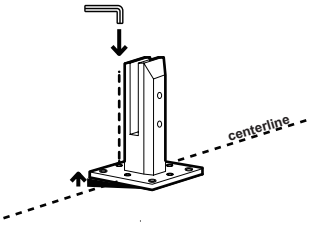
2) Pre-drill the holes for the lag head screws using the appropriate drill bit size.
(The matching screw recommends using a 1/2-inch drill bit)

3)



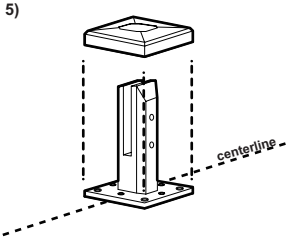
3) Secure the spigot in place by inserting 4 lag head screws into the previously drilled holes.

4)



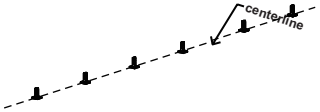
4) Use the 4 Allen key adjustment screws to level the spigot.

5)



5) Put on the cover plate

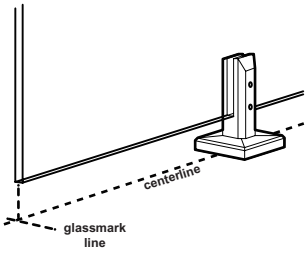
6)



6) Install all the required Spigot

STEP 4 INSTALLING THE GLASS

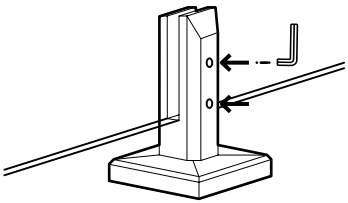
1)



Note: it is important that each spigot is well aligned on the centerline and that they are plumb and level to ensure that each glass panel slides in place smoothly.

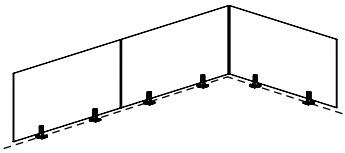
1) Align the glass panel so it is flush with your mark done in step1.

2)



2)Secure the glass panel into the spigot. Tighten the Allen key screws.

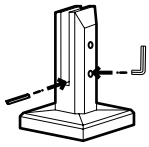
3)



3)Set in place every glass panel all along each respective span.

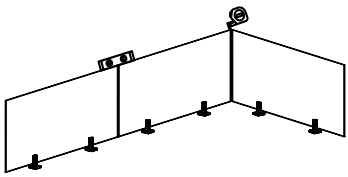
STEP 5 ADJUSTING THE GLASS

1)



1) Adjust the glass panels until it is leveled and that the proper gaps are obtained all around the perimeter of the glass.
Tip: Loosen the Allen key screws and use clear setting blocks provided in the installation kit to adjust the glass. Make sure to tighten the Allen key screws when done.

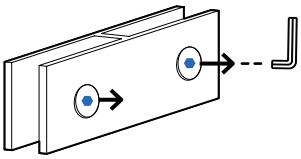
2)



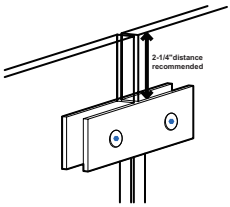
2). Perform final adjustments until the Glass panels are aligned and that there is an even reveal between glass.

STEP 6 INSTALLING THE GLASS BRACING CLAMPS

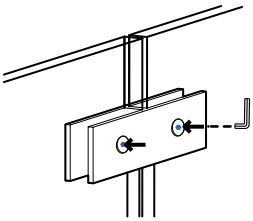
1)



2)



3)



Place the connector on the top of the glass or lower, depending on your preference.

1) Loosen the Allen key screws, then slide the clamp down into place.

2) Set the clamp at the desired height, with a recommended 2-1/4'' gap from the top of the glass to the top of the clamp.

3) Manually tighten the inner face of the fixed clamps

Tip: Make sure the gaskets are well positioned on both sides of the clamps before tightening the screws.

Note

The screws included with the product are designed for installation on concrete. If you need to install on wood, you need to purchase wood screws separately.
