

Bisphenol-A

CAS Number

80-05-7

Synonym(s)

4,4'-(propane-2,2-diyl)diphenol, BPA, p,p'-isopropylidenebisphenol, 2,2-bis(4-hydroxyphenyl)propane

Occurrence(s)/Use(s)

Used to make certain plastics and epoxy resins. BPA-based plastic is made into a variety of common consumer goods, such as water bottles, sports equipment, CDs, and DVDs. Epoxy resins containing BPA are used as coatings on the inside of many food and beverage cans and in making thermal paper such as that used in sales receipts.

Proposition 65

Chemical Status
