

Model #DV-1VM0311

Overall Dimension: 24" L x 1 3/16" W x 36" H

Features:

- The led mirror for bathroom features a smart anti-fog function that starts quickly and automatically turns off after one hour, eliminating the need to wipe down the mirror after a shower. The brightness is dimmable, and the smart memory function saves your settings, keeping the previous lighting status after turning the mirror off and on. (36W anti-fog power.)
- This wall-mounted lighted mirror offers plug-in or hard-wired options, with simple installation—mount the bracket and hang the mirror. It can be placed horizontally or vertically for flexibility.
- The LED light strips of this smart LED bathroom mirror are built into a smooth aluminum frame, allowing you to switch between three color temperatures: warm light (3000K), natural light (4500K), and white light (6000K). A long press cycles the light gradient from 3000K to 6000K, letting you customize brightness and light color to your preference. 3300 lumens front light (33W), total power 60W.
- The black metal-framed bathroom wall mirror design reinforces the glass surface, making it more durable and less prone to breakage, while offering a sleek and elegant look that complements any space.
