## HOW TO USE YOUR BINOCULARS

### Install batteries:

1. Opening both battery compartments.
2. Placing four (4) AA batteries in each compartment, aligning the terminals properly with the + and – symbols.
3. Replacing the lids to the battery compartments.

### Getting started:

1. Press the power button for three (3) seconds to turn on the binoculars.
2. Look at the LCD viewing screen.
3. Adjust the sharpness by turning the focus wheel in either direction until it becomes clear. Tap the Power button to adjust the brightness of the LCD viewing screen.
4. Zoom up to 2X by pressing the zoom button until you reach your desired level. If you keep pressing the zoom button, you will return to the default of 1X.
5. When using the binoculars at night, the lens should automatically adjust to the brightness level. Tap the IR button to adjust the IR brightness from levels 1-7.

### Using an SD card:

*Note: if you are using a card that contains previous files, you must save those files to your computer first before formatting the card for use in your binoculars. Failure to complete this step may result in the loss of files that were previously on your card.*

1. First, make sure the power is off.
2. Insert the card into the slot with the label facing up and the notched corner facing the binoculars. Push until it locks in.

- 3. To remove the card, push the card in until it releases. Once it is partially ejected, continue pulling it the rest of the way out.
- 4. If the "Memory Full" message appears on your LCD screen, then your card is full. Please save the files to your computer and then delete them from the card so that you can use it again.

Taking photos:

- 1. When you power on your binoculars, you will automatically start in Photo Mode. You should see the camera icon  in the upper left corner of your LCD screen. If you do not see the camera icon , press the Mode button until it appears.
- 2. Following the instructions in the "Getting started" section, adjust the sharpness by turning the focus wheel, and for nighttime use, adjust the brightness by pushing the IR button.
- 3. Press the Photo/Video button to capture the image.

Taking video:

- 1. With the power on, press the Mode button until you see the video icon  in the upper left corner of your screen.
- 2. Following the instructions in the "Getting started" section, adjust the sharpness by turning the focus wheel, and for nighttime use, adjust the brightness by pushing the IR button.
- 3. Press the Photo/Video button to capture the image.

Using Playback mode:

- 1. With the power on, press the Mode button until you see the playback icon  in the upper left corner of your screen.
- 2. The last file that has been saved will be displayed on the LCD screen. If it is a photo, the file suffix JPG will appear in the lower left corner of the screen. For a video, the file suffix AVI will appear in the lower left corner of the screen.
- 3. Use the Zoom and IR buttons to navigate through the saved files on your SD card.
- 4. Press the Photo/Video button to enter the menu of choices to Play, Delete, Delete All, or Exit. Use the IR button to navigate the choices and press the Photo/Video button to make your selection.

GUIDE TO MENUS AND SETTINGS

- 1. With the power on, press the Mode button until you see the menu.
- 2. Use the IR and Zoom buttons to navigate through the menu.
- 3. Use the Photo/Video button to select your choice and enter its submenu.
- 4. Once you have made your desired changes in the submenu, press the Photo/Video button to save your changes.
- 5. Press the Mode button to exit back to the main menu. Then press the Mode button again to re-enter Photo Mode.

TROUBLESHOOTING

Binoculars won't power on.

Check to make sure you have installed fresh AA alkaline batteries in the proper configuration indicated by the + and — symbols.

Poor image quality.

- If you normally wear glasses for vision correction, please leave them on while using binoculars.
- For daytime use, make sure the daytime use lens is in position, covering the main lens.
- For night use, make sure the daytime use lens has been removed to expose the main lens.
- Use the focus wheel by turning it slowly back and forth to adjust the clarity.

"Please insert SD card" error message when an SD card has been inserted.

- The SD card must be inserted while the power is off. Try turning off the power, removing and re-inserting the card, and turning the power back on.
- If the issue persists, try using another type of SD card. Some cards may not be compatible with your binoculars.
