

Van Zyverden's
COLOR YOUR GARDEN BLUE COLLECTION

Create a perfectly colored garden. One of the first choices you might make for your garden is what color or colors to use to fit your personality best and set the mood of your garden. Some colors pair well together, while others may tension. One way to create a unified garden is to use colors sparingly, creating so-called color echoes throughout the garden. When choosing a color, consider the overall effect you seek in your garden.

Use color as a garden accent

*Indispensable blooms as they
bring it to life to the spring garden*

*An incredible source of
inexpensive color for the garden*

About This Variety: Blue has a calming effect, encourages relaxation and brings serenity to the garden. Blue will make you feel better and is a favorite color for many people. Collection consists of: 12 Blue Heron Tulips, 12 Muscari Grape Hyacinths, and 5 Scilla Peruviana.

Growing Instructions: To ensure optimal results, allow adequate space and sunlight, plant at the appropriate depth and feed with a well balanced fertilizer. Remove the flowers as soon as they go, but allow the leaves to yellow before removing. Best planted in late fall. Some gardeners treat bulbs as annuals. For an informal look, plant in groups in natural swathes or bouquets.

Care Tip: In USDA zones 8-10, refrigerate the bulbs for no less than eight weeks. In the garden, plant them before frost, but not as early as in the northern part of the country. Planting them in a lightly shaded area will keep them cool and prolong blooming.

Exposure: Full sun to partial shade

Height: 6-24" tall

Spacing: Plant 3-8" apart, 3-8" deep

USDA Zones: Hardy in USDA zones 4-7

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
