

Thank You

for bringing me home!

Spruce Me Up

I've been in a dark box traveling. Here are some quick tips to get me settled:

- Remove yellow leaves or broked stems.
- If my soil is dry, give me a drink of water.
- Set me in the right light.

PLANT CARE

Pothos

Light

I like bright, indirect light where I cast a strong shadow at least a couple of hours a day, but don't mind medium light

Water

I don't want my roots to stay wet, so let the top inch or two of the potting soil dry before you water me again.

Food

I don't need a lot of fertilizer, so you can feed me once or twice in spring and/or summer. You can feed me more often if you want me to grow faster.

Features

I'm one of the most common houseplants around thanks to my easy-growing nature, variegated foliage, and how easy it is to propagate me.

Growing tips

Let me grow up vertically and my leaves will get a lot bigger. The more light I get, the better my variegation will be.

Give me friends! I play well with:

Pothos Global Green , Pothos Baltic Blue, Monstera Little Swiss
