

How to use Lightning Nuggets Environmentally Safe Fire Starters

**Great For
Wood Fired
Grilling,
Fireplaces,
Campfires!**

Place the Lightning Nugget Fire Starter
2 - 3 inches below cross points of fuel to allow for
proper ventilation and best performance. always
place the nugget **round side down** and light the
top flat edge.

Use usual precautions for flammable materials.
May need more than one depending on the fuel
size and moisture.

Lightning Nugget Fire Starters are made of a
highly resinous pine wood blended with a small
amount of food grade fully refined
paraffin wax. **Non-Edible**

Each Lightning Nugget is **GUARANTEED** to light and burn
for 15 minutes.

Our goal is to be safe and clean while recycling waste to a
viable re-purposed product of convenience and quality.
