WARNINGS

ADULT ASSEMBLY REQUIRED **CHOKING HAZARD - Small Parts** **NOT for children under 3 years of age.**

Please read these warnings and the information in this manual in its entirety.

Failure to comply with the following instructions may increase the risk of serious injury and/or death:

- It is essential that the intended site for this trampoline is completely flat and level. If the ground is not level this will cause movement in the frame and could cause stress on the joined sections.
 - Before each use of this product, inspect the entire assembly and replace any worn, defective or missing parts.
 - It is only recommended for use by children 3-9 years of age.
 - DO NOT exceed the recommended MAXIMUM WEIGHT limit of 250lbs (113kgs).
 - DO NOT wear glasses or helmets when using the trampoline.
 - DO NOT use the trampoline in wet, windy or other adverse weather conditions. Use only when the trampoline mat is clean, dry, and safe of obstructions.
 - ALWAYS jump in the center of the trampoline mat.
 - DO NOT use the trampoline as a springboard to or from other objects. NEVER jump from or attempt to jump to other objects, bodies of water, buildings or surfaces, or into or over the trampoline enclosure.
 - DO NOT allow other persons to go under, sit, stand or lie on the trampoline or the frame pads while the trampoline is in use.
 - DO NOT use the trampoline set when under the influence of alcohol, drugs or medication which may impair the jumper's judgment and coordination.
 - ALWAYS remove jewelry, belt buckles or any other sharp objects before using the trampoline.
 - ALWAYS secure the trampoline against unauthorized and unsupervised use.
 - NEVER wear footwear (e.g. shoes) when using the trampoline. ALWAYS wear socks when using the trampoline.
 - Children MUST NEVER use the trampoline unless supervised by a responsible adult with knowledge of trampoline use.
 - Ensure the trampoline set is on level ground with a minimum of 8 feet (2.5M) clear space around the sides, 26 feet (8M) clear height space above and that no obstructions are under the trampoline.
 - ALWAYS watch for hazards or obstructions above, around and below the location where you are installing your trampoline set. Failure to do so can result in serious injury, death, and property damage.
 - Children should be assisted when entering and exiting the trampoline to reduce the risk of falling.
 - The frame of your trampoline set is made of steel and it will conduct electricity. No electrical equipment (lights, heaters, etc.) should be permitted on or around the trampoline under any circumstance.
 - DO NOT allow more than one (1) person on the trampoline at a time. Jumpers may collide with one another, fall off the trampoline, fall on or through the springs or land incorrectly on the mat. Multiple jumpers increase the chances of loss of control, collision and falling off. This can result in severe injury or death.
 - Always secure the trampoline against unauthorized and unsupervised use.
- IMPORTANT:**
- You must not use the trampoline if you have a medical history of neck or back injuries or certain mental or physical conditions – an existing condition dramatically increases the risk of serious injury or death.
- No modification should be carried out to the trampoline or any of its components. Any modification could lead to damage to the product or result in a personal injury.
 - Should there be any missing parts, the trampoline must not be used until replacement parts have been fitted.
 - The frame pad should always be fitted properly, fully covering the trampoline frame and springs.
 - The use of gloves to protect your hands from pinch points during assembly is also strongly recommended.
- WEATHER CONDITIONS:**
- Special care should be taken as weather conditions change. In particular, a wet trampoline mat (bed) is too slippery for safe jumping.
 - Gusty or severe winds can cause jumpers to lose control. To reduce the chance of injury, use the trampoline only under appropriate weather conditions. In cold weather, tongues and lips can stick to metal at sub zero temperatures. In warmer and sunnier weather, parts can become extremely hot, and the temperature should be regularly checked during play, especially metal parts.
- HIGH WINDS:**
- If you anticipate high winds, the Trampoline must be moved to a sheltered location, or be disassembled. GQBrands is not responsible for any damage to property or product resulting from wind or extreme weather.
