

Prop 65:

ABOUT CALIFORNIA PROPOSITION 65

Proposition 65, officially the Safe Drinking Water and Toxic Enforcement Act of 1986, is a law that requires warnings be provided to California consumers when they might be exposed to chemicals identified by California as causing cancer or reproductive toxicity. The warnings are intended to help California consumers make informed decisions about their exposures to these chemicals from the products they use. The California Office of Environmental Health Hazard Assessment (OEHHA) administers the Proposition 65 program and publishes the listed chemicals, which includes more than 850 chemicals. In August 2016, OEHHA adopted new regulations, effective on August 30, 2018, which change the information required in Proposition 65 warnings.

We have vetted our supply chain for GrillGrates and Accessories per the list of chemicals cited by the State of California as potentially causing cancer and reproductive harm. All suppliers have certified our products as not containing or emitting these chemicals.

BARBECUE GRILL PROPOSITION 65 STATEMENT

GrillGrates are used with grills that do emit carbon monoxide which is known to the State of California to cause birth defects or other reproductive harm.
