Low	60 lm	45H 30M	29

OPERATION INSTRUCTIONS

On/Off: Press and release on/off button.

Cycle Modes: Press button softly to change modes. Switch between High, Medium and Low.

BATTERY REPLACEMENT

Battery Replacement:

The LP843 uses 3 AAA batteries. To replace them, turn the tail cap counterclockwise to remove it. Hold the flashlight with the light end facing down to slide out the battery case. Remove the old batteries and insert new ones, following the (+/-) markings on the battery case. For best performance, use brand-new alkaline batteries of the same voltage and brand.

Reinsert the battery case into the flashlight according to the arrow on the battery case. Finally, reattach the tail cap by pressing down gently and turning it clockwise until it is secure.

If you won't be using the flashlight for an extended period, remove the batteries and store it in a dry, protected place.

PRODUCT WARRANTY

The LP843 has a Limited Lifetime Warranty Against Manufacturer's Defects from time of purchase.

For warranty claims please contact us by calling 801-553-8886 or sending an email to info@luxpro.com
