QUIETWALK[®]
PREMIUM ACOUSTIC UNDERLAYMENT

Busy everyday life doesn't stop when you're at home. That's why QuietWalk flooring underlayment is made for homes that are loved and lived in. It does the tough jobs so that your floor can shine and look it's best even with kids and pets.

QuietWalk's unique Dri-Wick Technology manages moisture and spills as well, so you can live life to the fullest without worry on gorgeous floors.

Who says you can't have beautiful floors and live on them too?

Your floors can handle real life and still look their best with QuietWalk! This premium underlayment helps manage moisture, sound and insulation. These features help your overall home environment while providing support throughout your floor, keeping them beautiful longer.

All this and green?

Not only can you feel good about purchasing the best underlayment for your floors, with QuietWalk's patented recycled structure, you can feel good about helping the environment too!

QUIETWALK[®]
PREMIUM ACOUSTIC UNDERLAYMENT

LIFE HAPPENS!

But with QuietWalk, moisture, either from topside spills or the subfloor, is one less thing you have to worry about!

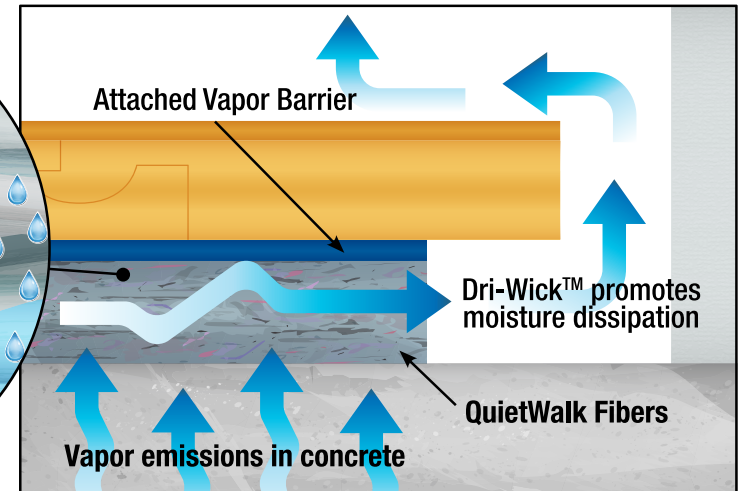

**MOISTURE?
NO PROBLEM.**

QuietWalk's patented, recycled, fiber structure aggressively attacks subfloor moisture by wicking and dispersing it throughout the pad to draw it up and away.

This action is called DriWick Technology which promotes moisture dissipation, allowing it to evaporate and escape.

Here's how it works:

Antimicrobial treated fibers inhibit mold and mildew

So go ahead, get messy, and live on those beautiful floors!

**QUIETWALK, THE BRAWN
BENEATH BEAUTIFUL FLOORS**

THE STRONG SILENT TYPE

Give us your energetic kids, playful pets, busy schedules, music and television. QuietWalk's incredible sound management helps you live peacefully with others without worry!

QuietWalk's dense, patented fiber construction absorbs and controls both impact and ambient sound to create a comfortable living space for everyone!

71 (IIC)
IMPACT SOUND
The higher the IIC number, the better the noise control!

Moving furniture, playing fetch with Fido, kids jumping, and people walking are all great examples of what can cause impact sound within your home.

QuietWalk plays a huge roll in reducing these transmitted noises so that the fun above doesn't affect the room below.

66 (STC)

AMBIENT SOUND

The higher the STC number, the better the noise control!

A full house isn't complete without talking, laughter, listening to music, or just relaxing and watch TV.

QuietWalk lets you do what you love without disturbing others by creating a barrier that reduces noise transmitted to upper levels by these everyday activities.

So relax, sit it back, and live it up with QuietWalk!

QUIETWALK®

PREMIUM ACOUSTIC UNDERLAYMENT

Not only can you have the performance that QuietWalk is known for, you can also contribute to a better environment!

Better products for your home and the environment

ECO FRIENDLY PERFORMANCE

QuietWalk's dense, fibrous pad is constructed by recycling textile materials that would have otherwise been thrown away!

Our patented process prevents up to 40,000 tons of landfill waste PER WEEK. That's equivalent to 100,000 pairs of jeans each month!

Recycled fiber composition

RECYCLED STRUCTURE

2,083,007,536 square feet of QuietWalk material has been sold since 1998, that's equal to 74.72 square miles (over 3 times the size of Manhattan), or about 36,163 football fields. Most of the fibers used in all of this QuietWalk would have previously ended up in landfills!

QUIETWALK®

PREMIUM ACOUSTIC UNDERLAYMENT

MADE FOR HEALTHY LIVING

QuietWalk's high standards of construction achieves the GreenGuard Gold certification, one of the highest qualifications used to keep products safe for indoor residential usage. Unlike many current household products, QuietWalk doesn't release harmful VOCs (volatile organic compounds) or chemicals which keeps your air clean and you healthy.

Not only can you have the performance that QuietWalk's known for, you can also feel good about contributing to a better environment!

THE BRAWN BENEATH BEAUTIFUL FLOORS

Jump, dance, live, on those beautiful floors!

Just because you live in your house doesn't mean your floors can't stay showroom quality. QuietWalk's dense fiber construction gives your floors, and their joints, the strength they need to stand up to everyday life.

QuietWalk allows your floors to live long and look beautiful. It does the behind-the-scenes work so your floor can take the credit. Don't worry though, it doesn't get too jealous.

QUIETWALK[®]

PREMIUM ACOUSTIC UNDERLAYMENT

MAKING YOUR HOME WHERE YOU WANT TO BE

Cozy, welcoming homes start with QuietWalk. This premium underlayment also helps insulate your home, working to keep the elements out and everyone inside comfortable and happy.

But wait, there's more!...

QuietWalk also works with QuietWarmth radiant floor heating film. This easy to use, razor thin technology, heats floors in cool months to create rich, inviting spaces where you'll want to be.

QUIETwarmth®

RADIANT FLOOR HEATING SYSTEM

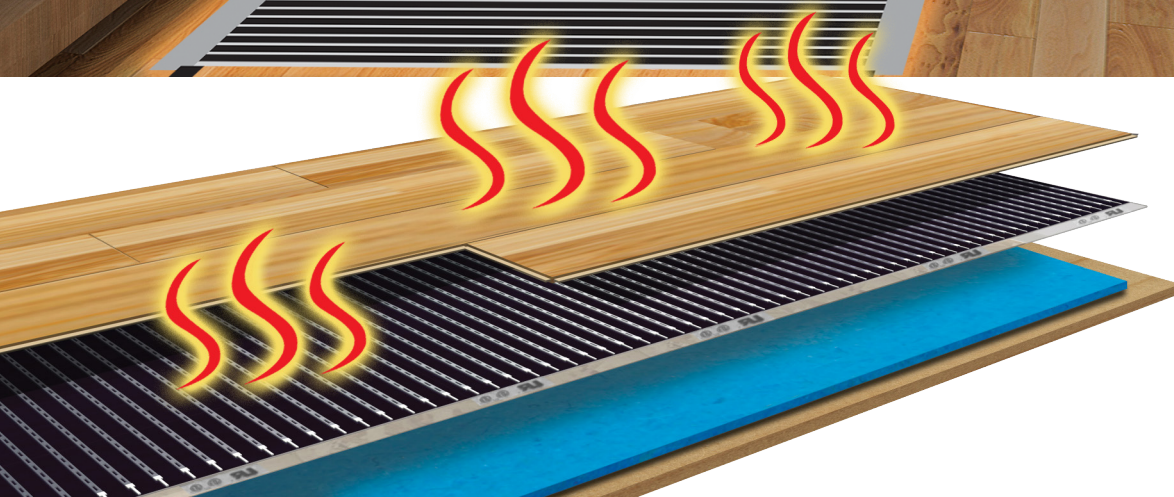

FOR FLOORS YOU WANT TO LIVE ON

QuietWarmth is a flexible, ultra-efficient radiant heat film that delivers ultimate thermal comfort by gently warming all types of floating floors with energy efficiency and low cost consumption.

COMPATIBLE FLOORING

To help you make the best purchase for your home, below are select flooring solutions which are compatible with premium **QuietWalk** underlayment.

PERFECT FOR PAD ATTACHED FLOORING

WORKS WELL WITH OTHERS!

QuietWalk knows that flooring used in everyday life needs all the muscle it can get. That's why it's the perfect complement flooring even with planks that have pre-attached pads.

But why use both?

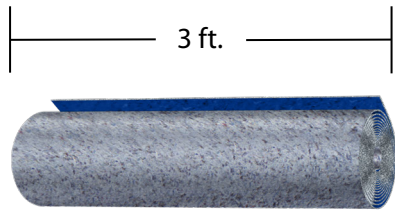

Attached pad flooring is a great start to providing support to your floor, however, complete moisture control, sound management, support and insulation can not happen without the uninterrupted coverage of QuietWalk.

This is because QuietWalk's dense, uncrushable, construction provides continuous support to the seam and click together mechanism where pre-attached pads can't reach, making it the perfect combo for pad attached floors that can handle everyday life!

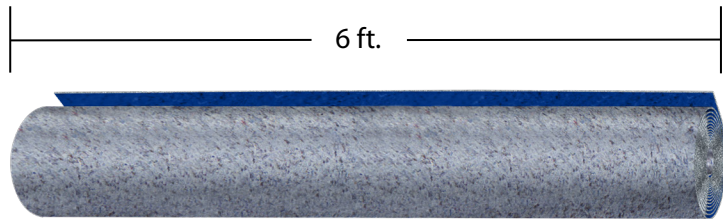

BECAUSE DIFFERENT ROOMS NEED DIFFERENT ROLL SIZES!

Making the most of each roll not only reduces waste but also helps you save you money for the things you love. That's why we produce QuietWalk in two convenient sizes! Choose from either a 360 square foot roll (6' x 60') or 100 square foot roll (3' x 33.3') to easily and efficiently cover each project!

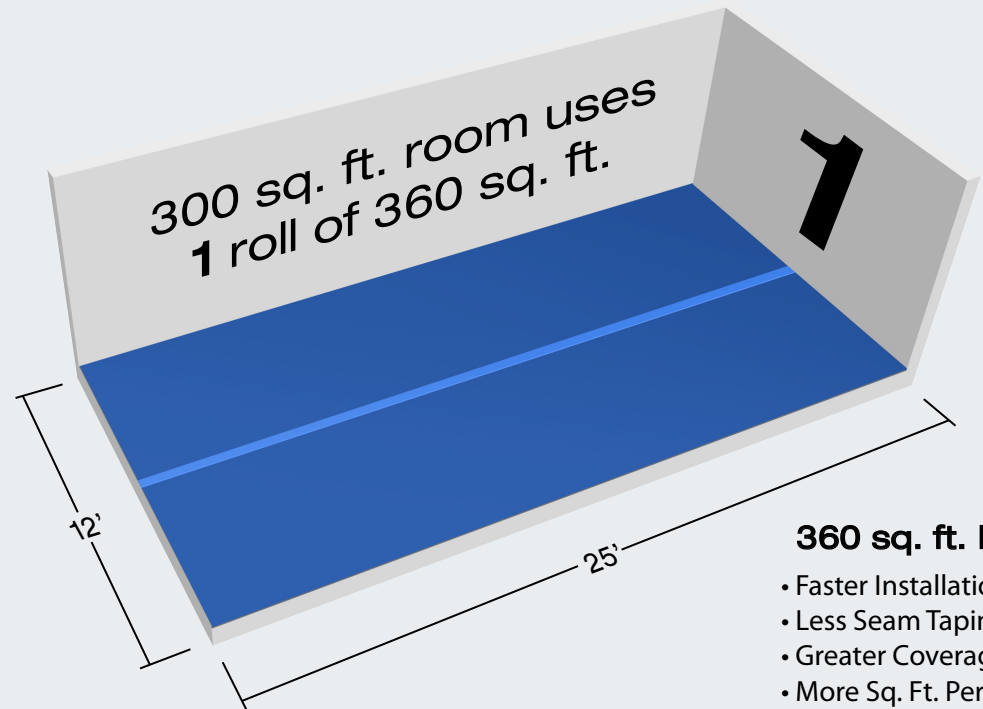

100 sq. ft. ROLL

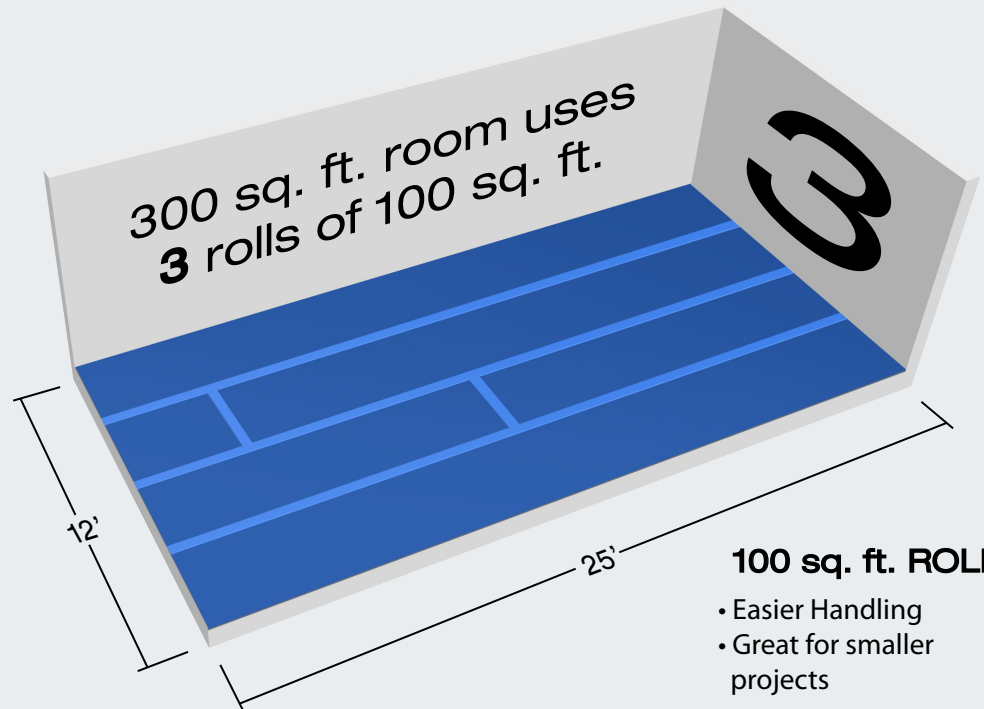

360 sq. ft. ROLL

QUIETWALK[®]
PREMIUM ACOUSTIC UNDERLAYMENT
WE'VE GOT YOU COVERED!

360 sq. ft. ROLL

- Faster Installation
- Less Seam Taping
- Greater Coverage
- More Sq. Ft. Per Dollar!

100 sq. ft. ROLL

- Easier Handling
- Great for smaller projects
