

*Van Zyverden's*  
HOSTA TWILIGHT

Hostas are not grown for their flowers but for their foliage, which are prettier than the flowers. They come in a spectrum of blues, golds, greens, yellows and whites as well as variegated, some speckled and others striped. They thrive in the shade, even though they can withstand some sun, are long-lived and low-maintenance. Many Hosta varieties have seasonal color or can change color depending on growing conditions. While there are over 3,000 cultivars to choose from, we offer some of the more extra-ordinary each unique in color, texture and form.

*good choice for mixed  
containers, tubs and/or pot*

*they thrive in the shade,

*hostas are grown for their flowers*

*About This Variety:* Hosta Twilight produces larger and wider leaves than Fortunei Auremarginata of which it is a sport. While the center of the leaf is a dark green, the wide golden margins is what makes this variety stand out. The leaves are heavy in substance. It is said to be slug resistant and sun tolerant.

*Growing Instructions:* While drought tolerant, they do not like being kept dry for long, and prefer rich, well-drained soil with a consistent supply of moisture.

*Care Tip:* Virtually maintenance free, clip out dead flower stalks after flowering.

*Exposure:* partial shade to full shade

*Height:* grows 20-21" tall

*Spacing:* plant 35-39" apart, 1.5-2" deep

*USDA Zones:* hardy in USDA zones 3-9

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
