

The ET-72G(W) is a smart and programmable thermostat that provides an optimal, cost-effective and energy-efficient heating system, for use with electric underfloor heating systems.

Features:

- Readout function: It can calculate the power consumption in the past 1Day, 30Days, and 365Days
- Sensor type selection: it is compatible with all three common used floor sensor type. This means you can replace old thermostats while still use their floor sensors that are already built under the floor.
- Smart interconnection: Extremely fast and easy WIFI connection. And you can easily share the thermostat to family members so that they can control, too.
- Works with Amazon Alexa and Google Assistant: you can control by talking like "Alexa, please turn on my living room thermostat to 85° F" .
- Adaptive function: it can heat up or stop heating in advance, giving you the temperatures wanted just in time.
- 2 versions for option, Wi-Fi and non-Wi-Fi
- 4" big screen, 3/4" slim body
- 7/5+1+1 Day Programming, 4 Settings / Day
- Max. load 120V = 1,800 Watts;
240V = 3,600 Watts
- Mode: Auto/manual/anti-frozen/override
- F° or C° scale
- cETLus approved (UL 60730-1, UL 60730-2-9, CSA E60730-1:13, CSA E60730-2-9)
- Easy installation, 3-5 min work
- Built-in Class A 5mA GFCI
- 3-year warranty, longest in the market
- 85-265Vac 50/60Hz, 15 amps
- 10ft (3m) floor sensor
- Dimension: 4.9x3.0x0.7 inches
