

How to choose your power inverters

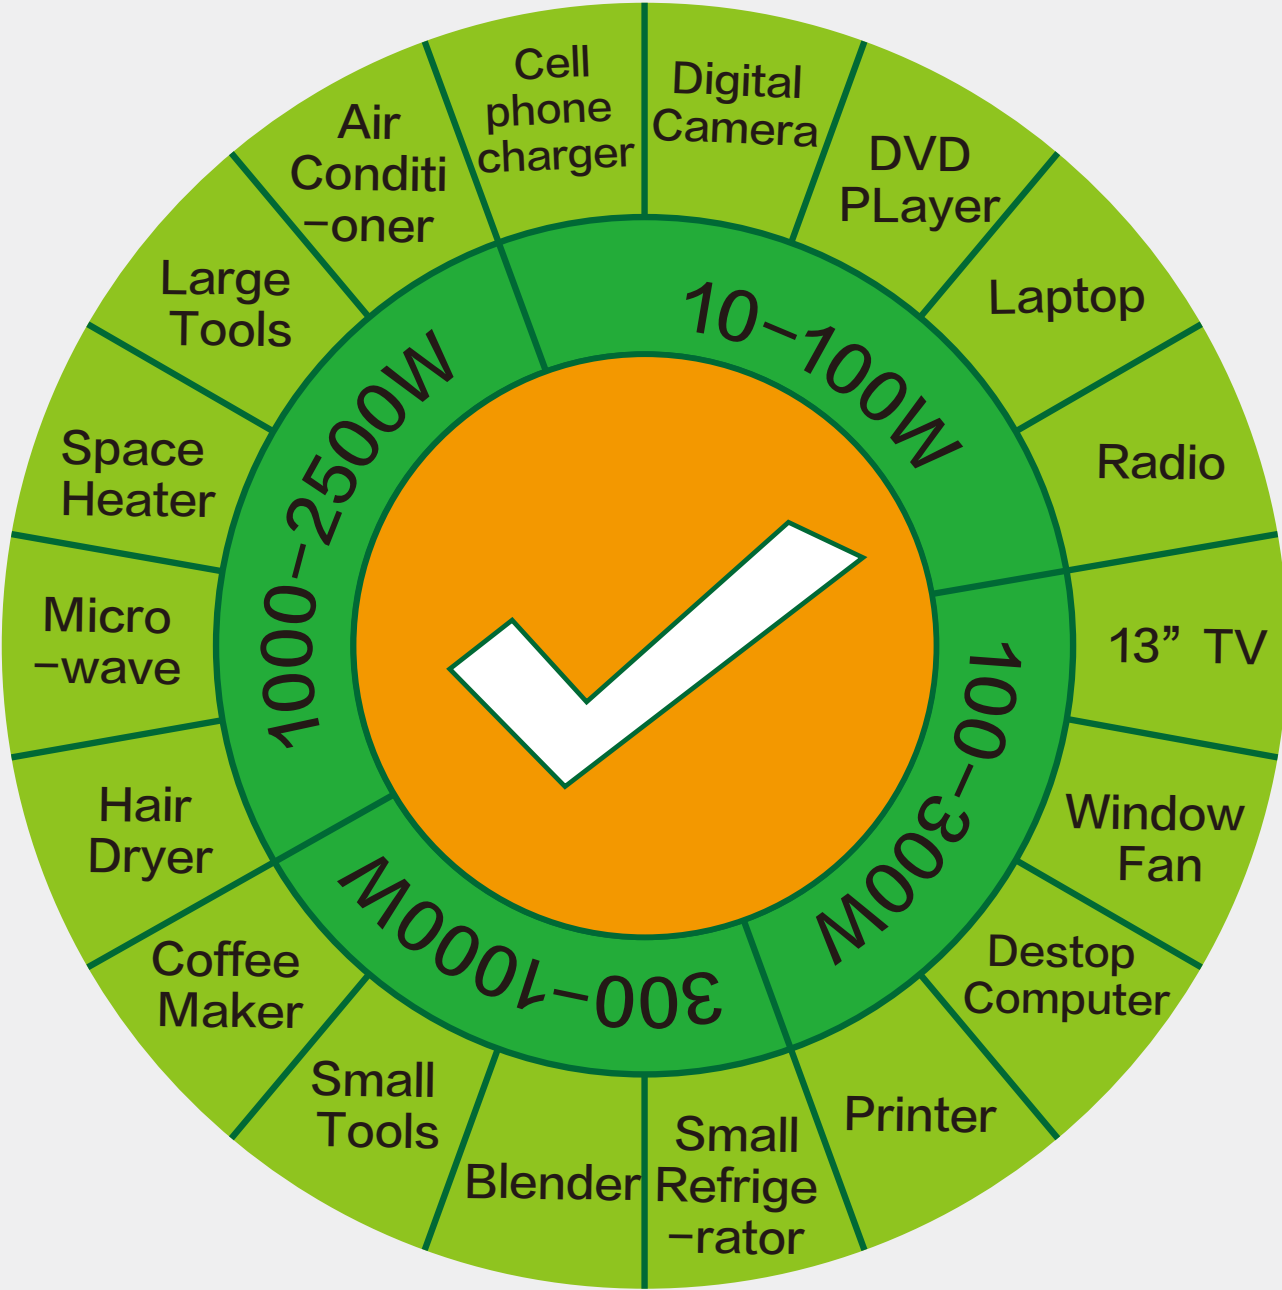

300W Inverters

750W Inverters

1000W Inverters

3000W Inverters

***Estimated applications Power. Power requirements may vary widely by appliance or tool brand, model, size and other factors**
If your device does not indicate the wattage .but provides the current consumption, multiply the current (Amps) by 110 (Volts)
EXAMPLE: 2 Amp device x 110 Volts =220 Watts, so a 300 Watt inverter is necessary to power this device
