

TNSL LED Strip Light

The 4ft TNSL is a versatile, light-duty LED strip light designed to deliver flexible, high-performance illumination for workshops, garages, closets, and other task-oriented spaces. Featuring switchable lumen outputs and selectable color temperatures, TNSL allows users to easily customize lighting to fit a variety of environments. Designed with installation flexibility in mind, TNSL can be surface mounted or suspended and linked together in runs of up to six fixtures for expanded coverage.

Key Features

- Switchable lumen and color temperatures technology for customizable lighting in a variety of spaces and tasks.
- Optional attachable reflectors help direct light where it is needed most, improving light distribution while reducing glare.
- Surface or suspended mounting options provide installation flexibility for workshops, garages, closets, and utility spaces.
- Linkable design allows up to six fixtures to connect together for expanded coverage with a clean, streamlined appearance.
- Installation-ready packaging includes hanger chains, cord and plug, junction box cover, and reflector accessories to simplify setup right out of the box.
- Long-life LED technology helps reduce maintenance and replacement costs over time.
- Available in both black and white finishes to better complement different space aesthetics.
