

# THE NUVOH2O DIFFERENCE

## IT'S SIMPLE.

If you want a full explanation check out: [How It Works](#). In short, the molecules in CitraCharge® keep the hard minerals too busy to stick to your pipes, fixtures, surfaces, and appliances. It is made with the same stuff found in lemons. Who doesn't love lemons?

## IT'S CONVENIENT.

When your cartridge is depleted, about every 4 – 6 months, you simply replace the cartridge. There's no lugging and lifting heavy salt bags each month from the store to your car, into your home, down into your basement, and into the salt basin.

## IT'S EFFECTIVE.

CitraCharge®, the technology that powers NuvoH2O's systems, is effective at preventing hard water scale build-up. We commissioned a third-party research firm to conduct extensive testing and the results were amazing.

## IT REMOVES EXISTING SCALE.

NuvoH2O systems can remove existing scale build-up. Over time, you will notice a decrease in the amount of crust you find on your faucets, pipes, and appliances.

## IT'S HEALTHY.

Some people think hard water is unhealthy, but hard water is not bad for you. The World Health Organization and the National Research Council, among others, have found that hard water can be an important source of calcium and magnesium. NuvoH2O leaves these important minerals in the water but prevents them from causing problems in your home.

## IT'S ENVIRONMENTALLY FRIENDLY.

NuvoH2O® softening systems do not damage the environment. All of the water that runs through it is dispersed throughout your home for you to use. The water that gets back to Mother Nature is better off. The citric acid lowers pH levels to where plants can thrive. What a treat for your house plants too!
