

TREE HUGGER® Installation

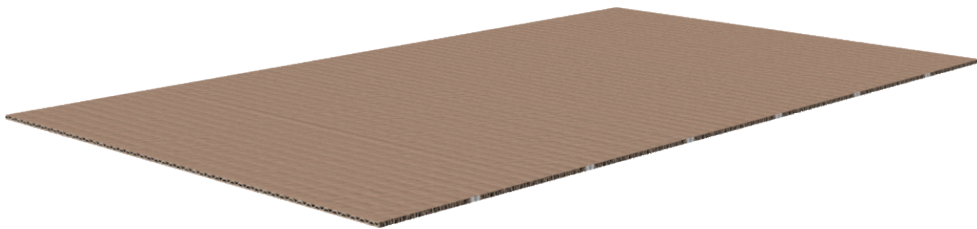

1. Adhere enclosed protective tree cushion square to the backside of the Tree Hugger® using the included double-sided tape, see diagram for proper placement.
2. Confirm length of your support member and placement of tree hugger on tree. See support member chart and diagram for your correct length to match clear trunk height placement on the tree for the Tree Hugger®.
3. Insert the support member into the Tree Hugger® support member opening.
4. Position the Tree Huggers with support member attached at the same height against the tree trunk.
5. Apply pressure from the top and bottom of the support member to properly seat and secure each Tree Hugger® against the trunk.
6. Install and insert into the Tree Hugger® band slots and around the trunk the included adjustable metal bands and tighten and secure firmly. (see diagram)
7. For added attachment screw in one screw through each dimple in the Tree Hugger® into the support member. (refer to dimple locations on diagram)

ADJUSTABLE METAL BAND(2)

PROTECTIVE CUSHION SQUARE (3)

SUPPORT MEMBER CHART	
Clear Trunk	Member Length
3'- 0"	3'- 11"
4'- 0"	5'- 02"
5'- 0"	6'- 04"
6'- 0"	7'- 07"
