

Storage Suggestion

To keep your drinks in the best taste, we suggest you store in this way.

| Drinks | Optimal storage temperature | Store shelf suggestion | Recommended temperature |
|-------------------|-----------------------------|------------------------|-------------------------|
| Carbonated drinks | 34-37°F (1-3°C) | The first shelf | 34°F(1°C) |
| Beer | 36-39°F (2-4°C) | The second shelf | 36°F (2°C) |
| Water | 41-45°F (5-7°C) | The bottom shelf | 41°F (5°C) |

Tips: For better cooling, we have a fan inside the unit, when you set the temp below 34°F, we suggest you put water in the bottom shelf to avoid it frozen.
