Metal Tile Use & Care Manual

Best Practices

- **Use a liquid non-abrasive household cleaner**
- **Avoid cleaners containing ammonia, bleach, abrasives or other hazardous/polluting compounds**
- **Always test in a small inconspicuous area when using a new cleaner to ensure compatibility with your metallic tile**
- **DO NOT use scouring pads, steel wool, sandpaper or other abrasive products**
- **Most metal tiles can be cleaned with warm water and dishwashing detergent**
- **Wash down the metal mosaic with a micro fiber cloth and rinse thoroughly so no streaks show on the metal wall tile**
- **Metal tile placed near water may develop stains from hard water deposits. To remove these stains, simply make a paste, using either baking soda and water, or borax and water. Apply to the entire surface with a cloth (not a brush) then rinse off**

using warm water and a clean, dry cloth. Repeat if necessary.

Stainless Steel: Use a Stainless Steel Cleaner with a Dry-Lint free Cloth

Titanium: Don't use soap and water to clean them, but make up a solution of equal parts vinegar and water then apply with a Dry-Lint free Cloth.
