3/4"		Non-Adhesive Zone
5/16"		Sealing Adhesive

## THE FUTURE OF PERIMETER SEALING

Constructed from high-grade 6 mil polyethylene and a permanently tacky rubber adhesive, Pergo PerimeterSeal™ outperforms traditional perimeter sealing methods. When correctly applied around the perimeter of flooring installations, PerimeterSeal will effectively seal the expansion area, preventing spills from damaging both the floor and subfloor.

The easy-to-use design promotes proper perimeter sealing, ensuring your floor and subfloor are safe for the life of the flooring using proven moisture-proofing technology against liquids, including pet urine.

PerimeterSeal has proven to be more effective than the standard silicone / backer rod process. It offers a lower cost and faster installation and ensures a more consistent and easier application. Choose Pergo PerimeterSeal for a reliable, efficient, and long-lasting flooring protection solution.

### What You Get

100 linear feet of perimeter sealing tape.  
*Equal to 4 tubes of silicone and 100 feet of foam backer rod.*

## KEY FEATURES

- Easy, clean application.
- No special tools needed.
- Excellent low-temperature adherence.
- Great tear resistance.
- Prevents moisture intrusion into floor expansion areas.
- Moisture protection at a fraction of the cost of other methods.
- Permanently tacky adhesive bonds to most surfaces.
