

VanZyverden's
TULIP DREAM TOUCH

Tulips are the indispensable blooms of the spring garden, as they bring it to life! They are unique in the range of size, shape, and bold color found in almost every color spectrum, that only tulips provide. Tulips are suitable for a wide range of plantings, are excellent in the rock garden, in formal beds, as elegant cut flowers, and for containers. They can be used in nearly any garden design scheme. Flowers are upward facing, with linear to lance-shaped green leaves on the stem. Tulip descriptions can become quite technical, as they are grouped into 15 different divisions, describing the petals, stamens and leaves in detail. Plant several different varieties of tulips throughout the garden to extend the blooming time.

Double Late Blooms

Very long lasting, Large blooms

Also known as a peony tulip

About This Variety: Double late tulips are among the most spectacular variety available. The flowers have so many petals that they look like peony flowers. A true knockout in the garden, it produces large, long lasting blooms. Easy to grow and excellent as exotic cut flowers.

Growing Instructions: To ensure optimal results, allow adequate space and sunlight, plant at the appropriate depth, and feed with a well balanced fertilizer. Remove the flowers as soon as they fade, but allow the leaves to yellow before removing. Best planted in late fall. Some gardeners treat tulips as annuals. For an informal look, plant in groups in natural swathes or bouquets.

Care Tip: In USDA zones 8-10, refrigerate the bulbs for no less than eight weeks. In the garden, plant them before frost, but not as early as in the northern part of the country. Planting them in a lightly shaded area will keep them cool and prolong blooming.

Exposure: Full sun to partial shade

Height: Grows 18" tall

Spacing: Plant 4-8" apart, 4-8" deep

USDA Zones: Hardy in USDA zones 3-7

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
