WARNING

- Must use ground nails, ropes, and expansions screws for whichever ground you install on for stability to avoid devastating injuries for people inside or nearby and property damage caused by a collapsing gazebo.
- Do not use this gazebo in high winds, heavy snow, or inclement weather. It is not designed to withstand strong gusts of wind, heavy snow accumulation, or other inclement weather. Must take precautions when the wind speed exceeds 25Mph, and clear snow when it accumulates more than 2 inches.
- Before use, thoroughly inspect the gazebo to make sure all bolts, nuts, and buckles have been completely tightened and securely fastened.
- Warranty does not cover damages, losses, or injuries resulting from improper installation, misuse, not using stability accessories mentioned above, non snow cleaning, failure to take precautionary measures, etc.

The following installation methods will provide better wind resistance performance, extend the product's lifespan, and help you maximize its value, delivering an even better user experience.

1

If the deck you are installing is made of hardwood and has a depth exceeding 40mm, you can use ST8*35mm screws to secure it in place. (This hardware is not included with the product, so you will need to purchase it separately.)

2

The best option is to fix it on a concrete surface. You can use the expansion bolts that are pre-configured with the product to secure it in place.
