

# King's Rack

## STEEL SHELVING

### Assembly Instructions

#### Parts List:

Long beam x 10

Short beam x 10

Post x 8

Particle board x 5

Plastic cap x 8 Post connectors x 4 Rubber hammer x 1 Post coupler x 4

Thank you for choosing King's Rack.  
We work to help you organize things better.

#### Kindly notice:

- Make sure the slots of the posts are pointing down and the ledge of the braces are heading up.
- Experiment proves that interference fit (tight fit) improves the sturdiness of the rack. So the rivets don't have to fully seat into the slot. 1 or 2mm gap at the bottom of the slot is acceptable.
- Use a mallet to let the rivet seal to the slot.

#### Vertical Assembly

P1

#### Step 1:

Set up a "U" shape by assembling 2 posts with 1 short beam.

- Place the rivets into the posts.
- Tap to seat the the rivets.

#### Step 2:

Finish the 1st tier.

- Assemble 2 long beams to the "U" Shape.
- Place 2 posts to the other ends of the long beams.
- Connect the 2 posts by placing 1 short beam.
- Add a wooden board to the base.

P2

#### Step 3:

Set up the 2nd tier.

- Add 2 long beams and 2 short beams to the post at the desired height.
- Add a wooden board to finish the 2nd tier.

#### Step 4:

Connect the upper and lower posts.

- Insert the upper rivet of the connector to the lowest hole of the upper post.
- Then insert the lower rivet to the top hole of the lower post.
- And fix it with the hammer.

P3

### Step 5:

- Set up the 3rd, 4th & 5th tier in reference of Step 3.
- Add 2 long beams and 2 short beams to the post at the desired height.
  - Add a wooden board to finish each tier.

P4

### Horizontal Assembly
