

Primed Shutter Painting Instructions

Your paintable shutters have been Pre-Primed which allows paint adhesion to the plastic. Paintable shutters will not be in any particular color. They have been produced to be painted in your desired color.

For best results, we recommend using a quality oil base paint. Paint should be applied according to the paint manufacturer's instructions

Note: Paint drying time will vary due to weather conditions. It may feel dry to the touch, but will not be completely cured for 7-14 days. Do not attempt to peel or scratch the paint until it has completely cured.
