

Van Zyverden's
WOOD HYACINTHS HISPANICA BLUE

The scilla family produces charming little flowers that bloom in spring and rank at the top of the spring-blooming bulb list for naturalizing. Flowers are available in a range of colors from blues, purples, pinks and white. Bell-shaped flowers that seem to open into a star appear in multiples atop stems that grow above the strap-like foliage. These spring beauties multiply quickly when planted beneath shrubs and trees and in woodland drifts to provide color that will return each year.

Best known as Spanish Bluebells

Naturalize well with showy flowers

Tolerates heavy shade

About This Variety: Wood hyacinths naturalize into larger and larger clumps, so you really get your money's worth over time. A woodland area is a perfect spot for naturalizing for years of blooms.

Growing Instructions: Grows well in the shade and in almost every type of soil. Will even grow where grass won't. They require little attention once planted.

Care Tip: Try them under trees or shrubs for a lush and colorful effect.

Exposure: Full sun to partial shade

Height: Grows 12-14" tall

Spacing: Plant 12" apart, 4" deep

USDA Zones: Hardy in USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
