LOCATION REQUIREMENTS

If your refrigerator is to be built-in, to ensure proper ventilation for your refrigerator, allow for 1/4" in. (6.35 mm) space on each side and at the top. When installing your refrigerator next to a fixed wall and the hinge side is next to the wall, leave 2 1/2" (6.35 cm) minimum to allow for the door to swing open. To open door wider, leave more space.

NOTE: Do not install the refrigerator near an oven, radiator, or other heat source, nor in a location where the temperature will fall below 55°F (13°C).

For best performance, do not install the refrigerator behind a cabinet door or block the base grille.
