

4-in-1 Multi-Functional LED Battery Backup Bulb

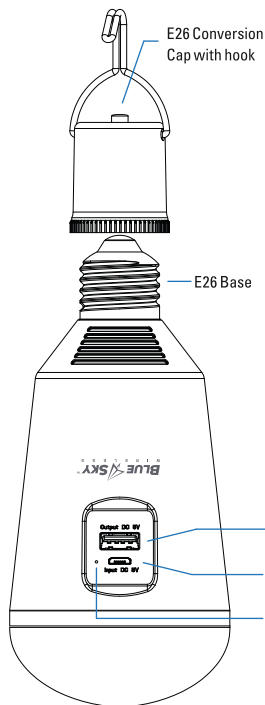

Instruction Manual

Thank you for purchasing our new A21 LED Battery Backup Bulb – providing you security when you need it the most! **FIRST THING'S FIRST:**

GETTING TO KNOW YOUR BATTERY BACKUP BULB!

FUNCTIONS

1. Functions as a regular, everyday light bulb. Compatible with recessed ceiling fixtures and lamp fixtures.
2. When the power goes out, the light bulb turns back on with the built-in back-up battery.
3. Use the included conversion cap to turn the light bulb into a portable flashlight or use the hook to hang the light bulb like a lantern.
4. Use the USB port to charge electronic devices (i.e., smart phone, tablet, etc).

USAGE INFO & CAUTIONS

- Do not use in a hot, humid environment. Do not put the bulb close to fire. High temperatures may cause explosion & combustion. Do not directly expose to rain.
- Do not stare into the light for extended periods of time as this could cause visual impairment.

To prevent danger from an electrical shock and/or short circuit, please turn your home's electricity OFF before removing the bulb from the lighting fixture to clean or use as a portable light.

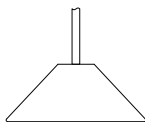

- If the product becomes defective, please do not try repairing or changing the back-up battery yourself. Please contact a professional or return to the manufacturer for proper handling.

HOW to USE YOUR BATTERY BACKUP BULB!

As a Regular
Light Bulb

Charge your mobile device

As an emergency
phone charger

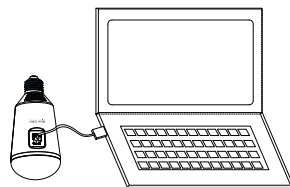

Converts to a
flashlight

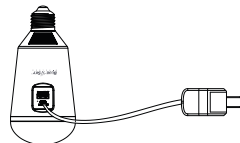

Conversion cap with hook
transforms the bulb into a
portable flashlight or lantern

THREE CHARGING METHODS

1. You can charge your Battery Backup Bulb by inserting it into a regular light fixture and powering on the electricity
2. Charge the bulb by plugging in the included cable to the Micro USB port on the bulb and the other end into a USB port on a computer

3. Charge the bulb by plugging in the included cable to the Micro USB port on the bulb and the other end into a USB AC adapter (not included).

USING YOUR BATTERY BACKUP BULB AS A PHONE CHARGER

When the power goes out and you need to charge your phone in an emergency you can use the 4-in-1 Battery Backup Bulb as a phone charger. Just use your phone charging cable by plugging one end into the USB port on the bulb and your phone on the other end.
