SOFT COPPER TUBING
UP TO **3X FASTER**
THAN MANUAL SWAGE TOOLS**

DCE450D1 20V MAX* COPPER SWAGE TOOL KIT

Efficiently complete a wide range of swaging applications and expand 3/4 in. soft copper tubing up to 3X faster** than a manual swage tool with the 20V MAX* Copper Swage Tool. Ideal for a variety of heating, cooling, and refrigeration workflows, this kit includes 6 expansion heads including 3/8 in., 1/2 in., 5/8 in., 3/4 in., 7/8 in., and 1-1/8 in. Ideal for soft copper applications requiring brazing, this tool consistently produces even swages, removing the need for copper fittings. To help prevent cracking, the 3/8 in. expansion head features a 2-stage adjustable collar that allows for a partial expansion in position 1 and a full expansion in position 2. The 20V MAX* Copper Swage Tool helps you finish jobs fast with up to 620 swages on one battery charge†.

* Maximum initial battery voltage (measured without a workload) is 20 volts. Nominal voltage is 18 volts.

** [ASTM B280 ACR] soft copper tubing, compared to Hilmor® 1839015 Compact Swage Tool, swage time only, using DCB203 battery.
