Write a Backyard Products, LLC. product review at backyardreviews.net for a chance to win a \$500 Visa gift card. No purchase necessary to enter. Must be legal U.S. resident (including DC & Puerto Rico), 18 or older to participate. Taxes on prize are responsibility of winner. Odds of winning depend on the number of eligible reviews received. Void where prohibited. For complete details and official rules, visit https://backyardreviews.net/sweepstakes-rules.

Base Building 10' x 10'

⚠ IMPORTANT! ⚠

READ INSTRUCTIONS THOROUGHLY PRIOR TO BEGINNING ASSEMBLY.

BEFORE YOU BEGIN

- BUILDING RESTRICTIONS AND APPROVALS
- Be sure to check local building department and homeowners association for specific restrictions and/ or requirements before building.
- ENGINEERED DRAWINGS

Contact our Customer Service Team if engineered drawings are needed to pull local permits.

SURFACE PREPARATION

To ensure proper assembly you must build your shed on a level surface.

Recommended methods and materials to level your shed are listed on page 10.

CHECK ALL PARTS

Inventory all parts listed on pages 5-8.

ADDITIONAL MATERIALS

You will need additional materials to complete your shed. See pages 3-4 for required and optional materials and quantities.

CONTACT OUR CUSTOMER SERVICE TEAM IF ANY PARTS ARE MISSING OR DAMAGED - Order form and warranty at back of manual -

Call: 1-877-743-3400 email: customerservice@backyardproductsllc.com

ORIENT LUMBER AND TRIM FOR BEST APPEARANCE

Framing lumber is graded for structural strength and not appearance. Exterior trim is graded for one good side.

Always install the material leaving the best edge and best surface visible. Please remember that these blemishes in no way negatively affect the strength or integrity of our product. (See Fig. A, B, C.)

ADDITIONAL MATERIALS

FOUNDATION OR FLOOR MATERIALS

- If you purchased a separate floor kit, use instructions and materials in that kit to construct your floor.
- See the FLOOR LEVELING section on page 10 for recommended methods and suggested materials to properly level your floor, as this will vary depending on your specific site.

REINFORCED WOOD FLOOR FRAME (OPTIONAL)

IMPORTANT! Depending on your specific use you may want to construct a heavy duty floor frame by adding additional floor joists (shown below as shaded). Below is a list of additional materials (not included):

REFER TO THE BACK OF THIS MANUAL AND THE MANUFACTURER'S INSTRUCTIONS FOR INSTALLATION OF SHINGLES, DRIP EDGE AND FELT.

🗌 x1 Caulk 🗆				,						

 \triangle Allow new concrete slabs to cure for at least seven (7) days.

• A treated 2x4 (5,1 x 10,2 cm) sill plate is required when installing your shed on concrete.

Purchase full length treated lumber, or butt shorter pieces end-to-end and seal seams with caulk.

• Use a high quality exterior grade caulk beneath all sill plates.

• Fasten 2x4 (5,1 x 10,2 cm) sill plates to slab using approved concrete anchors (fasteners not included).

Check local code for concrete foundation requirements.

OPTIONAL WOOD FRAME FLOOR LEVELING OPTIONS

There are multiple ways to level your floor frame. Our recommended leveling method is shown below. Leveling materials are not included in this kit.

/! Use only wood treated for ground contact and fasteners approved for use with treated wood.

✓! Always support frame seams.

LEVELING METHODS

- Level under 4x4 runners only.
- Locate leveling material 12" from ends of runners and no more than 48" apart.
- Asphalt shingles should be used between 4x4 runners and blocks or treated lumber. Never use shingles in direct contact with ground.
- For best results and aiding in water drainage use gravel under each concrete block.

LEVELING MATERIALS

Gravel Solid Masonry Blocks in 1", 2", 4" or 8" thickness 2x4 Treated Lumber

Asphalt Shingles

Leveling higher than 16" not recommended.

LEVELING & SQUARING THE FLOOR FRAME (Not Included)

LEVEL AND SQUARE FLOOR FRAME

Before attaching floor decking, it is important to level and square the floor frame. A level and square floor frame is required to correctly construct your shed. STOP!

See page 10 for the preferred floor leveling method. Use a level and ensure the frame is level before applying floor panels.

BEGIN

STOP!

Check for frame squareness by measuring diagonally across the corners **(diagonal measurement D)**. If the measurements are the same, the frame is square. Use the chart below to determine measurement D.

4x4 runners are generally installed 12" (30,5 cm) from ends of floor frame and under any seams.

After the frame is level and square, secure one side of frame to 4x4 runners using one fastener at ends of each runner.

At the opposite end of the frame, secure the frame to 4x4 runners with one fastener at the ends of each runner, ensuring that the frame remains square.

Fasten the frame to the 4x4 runners with (2) 3" screws at each connection (Fig. A).

- The floor should used as a stable work surface for wall construction.
- Organize your assembly procedure during the build process to avoid over-handling of the walls.

HINT:

WALL INDEX

10' x 10' After assembling the walls for your 10' x 10' shed, go to page 26 for wall installation.

10' x 10' Wall 01: Page 16 Wall 02: Page 18 Wall 03: Page 20 (Build 2 eave walls)

10' x 14' After assembling the walls for your 10' x 14' shed, go to page 31 for wall installation.

10' x 14' Wall 01: Page 16 Wall 02: Page 18 Wall 04: Page 22 (Build 2 eave walls)

10' x 18' After assembling the walls for your 10' x 18' shed, go to page 37 for wall installation.

10' x 18' Wall 01: Page 16 Wall 02: Page 18 Wall 05: Page 24 (Build 2 eave walls)

DOOR HEADER

NISH Your door header is now assembled.

GABLE WALL 01 WITH DOOR

Orient parts on edge on floor as shown. Measure and mark from end of boards.

Orient Pre Assembled Header as shown (Fig. A).

Secure with (2) 3" nails at each connection and (4) 3" nails at seams.

2 Fasten (3) middle parts AL to Pre Assembled Header with (2) 3" screws (Fig. B).

Fasten (2) end AL to studs AI with (4) 3" nails at each side.

Secure parts AL to top plates with (2) 3" nails at each connection and (4) 3" nails at seam.

Orient parts on edge on floor as shown. Measure and mark from end of boards. Secure with (2) 3" nails at each connection and (4) 3" nails at seams.

Install the **48" x 84"** and (2) **23-7/8" x 84"** panels flush to installed panels.

Locate panels 1-1/2" from the top plate.

Secure with 2" nails spaced 6" apart on edges and 12" apart inside panel.

Note the panel lip-edge/square edge orientation.

Your 10' gable wall 02 is now assembled. Carefully flip the wall over.

Carefully flip the wall over. Repeat all steps to build the 2nd 10' eave wall.

Install (1) **48" x 84"** panel 1-1/2" from the top plate.

Use a 2x3 spacer for consistent measurement.

Secure panel with 2" nails spaced 6" apart on edges and 12" inside panel.

Note the panel lip-edge/square edge orientation.

Install (2) **48" x 84"** and **23-7/8" x 84"** panels flush to installed panels.

Locate panels 1-1/2" from the top plate.

Secure with 2" nails spaced 6" apart on edges and 12" apart inside panel.

Note the panel lip-edge/square edge orientation.

FINISH

Your 14' eave walls are now assembled.

Carefully flip the wall over. Repeat all steps to build the 2nd 14' eave wall.

FINISH

Your 18' eave walls are now assembled.

Carefully flip the wall over. Repeat all steps to build the 2nd 18' eave wall.

STANDING YOUR WALLS

The following steps show how to stand and secure your walls for a 10' x 10' shed.

For a 10' x 14' shed, start on page 32.

For a 10' x 18' shed, start on page 38.

BEGIN

3

Orient parts on top of wall frames. Measure and mark from end of boards.

2 Secure from top with (2) 3" nails spaced every 24" (Fig. A).

Secure from bottom with (2) 3" screws at each corner (Fig. B).

CONTINUE TO PAGE 43 TO CONTINUE BUILDING YOUR SHED.

Align rafters over the wall studs.

Check that you have the measurements shown. Secure rafters with (2) 3" screws angled at each end **(Fig. A, Fig. B)**. Secure rafters on opposite side.

Maintain the measurements between rafters.

10' x 18'

INISH

Your rafters are now installed.

Repeat steps for installation of the opposite side 10' gable (with window).

Gable End Rafter

5

Maintain spacing between the center of the rafters at the lower edge of the panels (Fig. D).

Secure panels with (1) 2" nail into each rafter, as shown.

Move to the top of the panel and keep spacing between the center of the rafters.

Secure panels with (1) 2" nail into each rafter.

6 Next, install 23-7/8" x 48" and 23-7/8" x 96" roof panels with a 3/4" measurement on the rafter (Fig A) and flush to the installed panels (Fig. E).

Secure panels with (1) 2" nail in each corner.

Install 11-7/8" x 96" and 11-7/8" x 24" roof panels flush to the installed panels.
Secure panels with (1) 2" nail in each corner.

Repeat all steps to install roof panels on the opposite side.

Maintain spacing between the center of the rafters at the lower edge of the panels (Fig. D). Secure panels with (1) 2" nail into each rafter, as shown.

Move to the top of the panel and keep spacing between the center of the rafters.

Secure panels with (1) 2" nail into each rafter.

Repeat all steps to install roof panels on the opposite side.

Using the long edge of the panel as a lever, move the panel sideto-side until the top corner is flush to the peak **(Fig. B)**.

Move gable end rafter edge until it is 1/2" from the **48**" **x 47-7/8**" roof panel **(Fig. C)**.

Secure panel with (1) 2" nail in each corner.

Secure panels with (1) 2" nail into each rafter, as shown.

Move to the top of the panel and keep spacing between the center of the rafters. Secure panels with (1) 2" nail into each rafter.

10 Secure all roof panels with 2" nails spaced 6" apart and 12" apart inside panels.

GABLE TRIM		
PARTS REQUIRED:	x88	5,1 cm)
x2 ZQL $5/8 \times 4 \times 48-5/16$ (1,6 x 10 x 123 cm)		
X2 ZQR 5/8 x 4 x 48-5/16 (1,6 x 10 x 123 cm)	x2 ZJR 5/8 x 4 x 36" (1,6 x 10 x 91 cm)	

Install upper gable trim ZQR and ZQL flush to top of roof panels and flush at peak. Secure trim with 2" finish nails evenly spaced, as shown.

Install lower gable trim ZJR and ZJL flush to top of roof panels and flush to installed trim. Secure trim with 2" finish nails evenly spaced, as shown.

Repeat steps to install trim to the opposite gable.

Your gable trim is now installed.

 Install gable end 83-1/4" corner trim under gable panel, (Fig. A) and flush to eave wall panel (Fig. B). Secure with 2" finishing nails spaced evenly.

2 Install eave side **83-1/4**" corner trim flush to eave soffit and flush along seam of installed corner trim (**Fig. C**). Secure with 2" finishing nails spaced evenly.

Your corner trim is now installed.

Your collar tie(s) are now installed.

Repeat steps to build a second loft joist.

INISH Your loft joists are now assembled.

Repeat STEPS 2 - 3 to install second loft joist at the 2nd stud from the 10' wall.

Your loft support and joists are now installed.

INISH

BEGIN

Install loft panels centered over loft joists and ledger board. Secure with 2" nails spaced 8" apart.

NOTE: There will be a gap of approximately 1/2" (13 mm) on either side of installed deck panels.

NISH Your loft is now completed.

Place doors on flat surface. 3/8" offset is to top. Look for red (right) and green (left) on hinge board.

Attach temporary supports **OO** and **GAA** as shown.

Remove temporary supports and check to make sure doors open and close properly.

FINISH Your doors are now installed.

2

FINISH

Install trim **AH**, **AHL** and **AHR** as shown. Level **AH** before installing. Fasten trim to each door from inside with (11) 3/4" screws (**Fig. A**, **Fig B**).

Center trim **ZJ** over doors and secure with (7) 2" finishing nails into framing as shown.

3 Install 64" metal threshold with (11) 3/4" screws.

(11) Special Coating Screws

Your door trim and metal threshold are now installed.

DOOR HARDWARE

PARTS REQUIRED:

x4 ••• x12 () 3/4" (1,9 cm) 0

Install decorative hinges in locations shown. Secure with 3/4" screws.

DOOR HARDWARE PARTS REQUIRED: 5/16" (7,9 mm) Drill Bit **x8** () x2 🛛 3/4" (1,9 cm) Place bolt on **OO** in open position with bolt end 3/8" (9,5 mm) down from frame. Bolt is open when loop is contacting base (Fig A). Mark and pre-drill holes for screws. Install bolt with screws supplied. 2 Drill 5/16" (7,9 mm) hole deep enough for bolt to slide into. 3 Place bolt on **OO** in open position with bolt end 1/2" (12,7 mm) up from floor. Bolt is open when loop is connecting base (Fig. B). Mark and pre-drill holes for screws. Install bolt with screws supplied. Drill 5/16" (7,9 mm) hole deep enough for bolt to slide into.

DOOR HARDWARE

PARTS REQUIRED:

5 Measure and mark location of hole on outside of right door as shown (Fig. A). Pre-drill hole with 1/4" drill.

Re-drill hole with 3/8 " drill.

Keep drilled hole square to trim to avoid breaking edge of door stiffener.

⁶ Insert handle in hole and secure with 1-1/4" screws.

Attach inside handle and secure with set screw, as shown.

FINISH

Your spring bolt, T-handle and decorative hinges are now installed.

You have installed your hook & eyes.

VENT (Not included in kit.)

• Follow directions provided by manufacturer and these instructions.

x12 ()↓↓↓↓↓↓↓ 1/2" (13 mm)

Locate and mark for two vents in side walls as shown; (1) at top and (1) at bottom.

Cut out marked openings.

Caulk behind vent flanges.

Secure with 1/2" screws.

Your vents are now installed.

PAINT & CAULK - NOT INCLUDED -

- Use acrylic latex caulk that is paintable. Caulk at all horizontal and vertical seams, between the trim and walls, and all around the door trim.
- Use a high quality exterior acrylic latex paint. When painting your building, there are a few key areas that can be easily overlooked that must be painted:
 - Bottom edge of all siding and trim
 - Inside of doors and all 4 edges

Note:

Prime all un-primed exterior wood before painting. (Follow directions provided by manufacturer.)

• Install felt flush to all roof edges overlapping 3". Use minimal amount of roofing nails to hold in place.

SHINGLES - NOT INCLUDED -

Familiarize yourself with a 3-Tab Shingle.

Install first starter row upside down and color up with a 1" overhang at back and bottom of roof panel. Use (4) nails per shingle. Starter row must be straight and level all the way across with lower edge of roof deck. NOTE: If you have installed drip edge install shingles flush to drip edge.

SHINGLES continued...

2

3

Beginning at front of shed, install first row of shingles with notch at 1" past roof edge or flush with drip edge.

Install second row of shingles flush at top of first row's rain slots. Ensure 1" overhang or flush to drip edge at front, stagger each row.

SHINGLES continued...

5

Continue installing rows of shingles to the peak. At the peak make sure there is a maximum of 5" or less to the rain slot, as shown below. If shingles overlap at ridge cut to peak with a utility knife.

• If more than 5" to rain slot you must install another row of shingles.

Repeat steps 1 - 7 to shingle the opposite side of your roof. Trim shingles at ridge.

Once both sides are shingled you need to trim ends. Strike a chalk line 1" from edge.

6

7

Using your shingle hooked blade carefully cut shingles along chalk line.

SHINGLES - RIDGE CAP

• You will finish off the top of the roof with a ridge cap made from shingles.

SHINGLES - RIDGE CAP continued...

Continue installing ridge cap to back of roof.

6

7

4

Make sure there is 4" between the shingle-color and edge of shingles.

When you have 4" minimum of shingle color cut one piece to cap your roof.

Install flush to shingles.

LIMITED CONDITIONAL WARRANTY*

Backyard Storage Solutions, LLC warrants the following:

- 1. Every product is warranted from defects in workmanship and manufacturing for 1 year.
- 2. All accessories, hardware and metal components are warranted for 2 years.
- 3. All Oriented Strand Board (OSB) is warranted for 2 years
- 4. Siding and Trim is warranted for 15 years.
- 5. LP Prostruct® Flooring is warranted for 10 years
- 6. Cedar lumber is warranted for 15 years.
- 7. Preserved Pine is warranted for 10 years.
- 8. Redwood is warranted for 10 years.
- 9. Metal Roof is warranted for 25 years.

Backyard Storage Solutions, LLC will repair, replace or pay for the affected part. In no event shall Backyard Storage Solutions, LLC pay the cost of labor or installation or any other costs related thereto. All warranties are from date of purchase. If a cash refund is paid on an affected part, it will be prorated from the date of purchase.

CONDITIONS

The warranty is effective only when:

- 1. The unit has been erected in accordance with the assembly instructions.
- 2. The unit has been properly shingled and painted or stained and reasonably and regularly maintained thereafter.
- 3. The failure occurs when the unit is owned by the original purchaser.
- 4. Backyard Storage Solutions, LLC has received the warranty registration card within thirty (30) days of purchase and notification of the failure in writing within the warranty period specified above.
- 5. Backyard Storage Solutions, LLC has had reasonable opportunity during the sixty (60) days following receipt of notification to inspect and verify the failure prior to commencement of any repair work.

REQUIREMENTS

Storage Buildings

To validate your warranty, it is necessary to properly maintain your Backyard Storage Solutions, LLC unit; shingle the roof and paint or solid-colored stain the siding using quality, 100% acrylic latex exterior product with a minimum of two (2) coats within thirty (30) days of assembly; caulk above all doors and all horizontal and vertical trim boards; paint and seal all exposed edges, sides and faces of siding/trim and OSB siding to include all exterior walls and all sides and all edges of doors.

Gazebos & Pergolas

To validate your warranty, it is necessary to properly maintain your Backyard Storage Solutions, LLC unit. This includes treating all of the exposed cedar and pine surfaces on your gazebo or pergola structure with an exterior grade wood preservative, an exterior oil-based semi-transparent stain, an acrylic latex exterior paint or an acrylic latex solid color exterior stain within 30 days of assembly and as needed thereafter to maintain your warranty.

Keep vegetation trimmed away from building and make sure siding panels and trim do not come in contact with masonry or cement. The minimum ground clearance for siding must be one half inch (½ inch) from concrete slab or two and one half inches (2 ½") from the ground when building is erected or constructed on a treated wood floor kit. Water from sprinklers must be kept off unit. In no event will Backyard Storage Solutions, LLC be responsible for any indirect, incidental, consequential or special damages nor for failure(s) that are caused by events, acts or omissions beyond our control including, but not limited to, misuse or improper assembly, improper maintenance (which eventually leads to rot or decay) and acts of God. Backyard Storage Solutions, LLC will not be held responsible for any labor costs incurred to construct your unit.

This warranty gives you certain specific rights that vary from state to state.

CLAIM PROCEDURE

To make a claim under this warranty, you can either call 1-888-827-9056 or email: customerservice@backyardproducts.com. Please have ready the information below when you call or include the information in your email:

- 1. The model and size of the product.
- 2. A list of the part(s) for which the claim is made.
- 3. Proof of purchase of the Backyard Storage Solutions, LLC item, as shown on the original invoice or receipt.
- 4. Run code: found on exterior product label or assembly instructions enclosed in the product package.

All other inquiries can be mailed to:
