

CSVT™ LED Vapor Tight Easy to Stock, Install and Maintain

The CSVT by Lithonia Lighting delivers trusted vapor-tight performance - now with expanded configurability and a new 2ft size.

Installation Options

The CSVT can be surface mounted, suspended or row mounted. Additionally, can be opened without any tools. The quick disconnects between the driver and the LEDs allow you to remove the LED tray so it doesn't interfere with installation.

Ratings and Maintenance

The CSVT uses a tongue & groove, poured in gasket design that is compressed using a series of stainless or polymeric latches along the outside of the fixture body, allowing for the lens to hang when opening for easy, on the go maintenance and provides for impressive ratings such as CSA wet location, IP65, IP66 for general washdown, IK10 and NEMA-Type 4x!
