For All Types of Composite Decking

The Deck-Drive™ DCU Composite screw is engineered to provide beautiful fastening results for all types of composite decking while also offering greater ease of installation, a clean finish and superb corrosion resistance. Now there is one go-to-product line for all your composite decking applications, eliminating the need to mix and match screws to the decking they are suited for — or to the environment where the deck is built.

For superior corrosion resistance in marine or high-exposure environments, choose the appropriate stainless-steel DCU Composite screw (Type 316 or Type 305). They are now available with color-matching painted heads in 11 colors to blend with popular decking manufacturers, and to provide a more concealed professional finish. For medium levels of corrosion resistance, carbon-steel Deck-Drive DCU Composite screws are available in 11 colors of our Quik Guard® coating, also matched to blend with most major decking manufacturers.

DCU Composite screws are available in 2¾" and 2" lengths for a variety of deck boards and cladding.

These screws are offered in bulk and collated for the Quik Drive® auto-feed screw driving system.

DCU Corrosion Resistance Table

Decking Screw	Material/Coating	Environment	Environment Example	Corrosion Resistance Level
DCU COMPOSITE SS	Type 316 Stainless Steel	Coastal/water	Marine and coastal environments, brackish water, severe weather, pool/hot tub areas	Up to severe corrosion resistance
DCU COMPOSITE SS	Type 305 Stainless Steel	Elevated service	Wet areas, freshwater rivers and lakes, moderate weather exposure	Up to high corrosion resistance
DCU COMPOSITE	Quik Guard	Dry service and wet service	Interior and exterior applications, preservative-treated wood	Up to medium corrosion resistance

* Quik Guard coating has been evaluated for use in ACQ-treated wood (0.4 pcf) by Simpson Strong-Tie following ICC-ES AC257. (See strongtie.com/info for more information.)

Trex® Deck-Drive DCU Composite screws are approved by Trex® for Trex 1" x 6" and 2" x 6" composite decking.

For All Types of Composite Decking

Deck-Drive™ DCU Composite screws are engineered to be the fastener of choice for virtually all types of composite-decking products, including wood/plastic composites, encapsulated wood/plastic composites, HDPE (high-density polyethylene). In addition, the DCU SS screw is the ideal solution for PVC decking.

Available in 11 color-matched shades to blend with these leading composite-decking manufacturers' products:

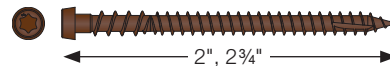

- AZEK®
- Clubhouse
- Deckorators®
- DuraLife™
- EverGrain®
- Fiberon®
- Gossen®
- Lumberock®
- MoistureShield
- Rhino Deck®
- TanDeck™
- TimberTech®
- Trex®
- TUFboard®
- Veranda®
- Wolf®
- And more

For color-matching information, please refer to strongtie.com/deckcolormatch.

Save Time and Money with Higher Installation Speeds and Consistent Performance

The Quik Drive® PRO300S decking system is ideal for driving collated Deck-Drive™ DCU Composite and DCU Composite SS. Stand-up driving helps you save on labor, with less user fatigue and better fastening consistency.

The PRO300S Decking System Includes:

- PRO300S decking attachment (also sold separately)
- Extension for stand-up driving
- Decking nose clip for consistent screw placement
- Quiver for keeping screws at your fingertips
- Rugged tool case
- Choice of Makita® or DeWalt® screwdriver motors*
- Lifetime warranty (see strongtie.com/warranty for more information)

* DeWalt and Makita are trademarks of their respective companies.
