

## PLPTS 2/3/4 (Version 1)

Pro DJ Laptop Tripod Adjustable Stand For Notebook Computers

<http://www.pyleaudio.com>

Thanks for purchasing the **PLPTS**, a professional DJ laptop stand great for mixing it up at gig.

### Specifications:

- Portable Laptop/Notebook Desk/Workstation
- Easily Adjustable Height
- Stand For Musicians, DJ-Based Performances
- Black High Gloss Finish
- Steel Frame Construction

Your kit includes one (1) set of the following items:

1 x tripod base

1 x laptop surface

1 x support plate

4 x screws (in bag)

4 x washers (in bag)

**Note:** your stand may include different parts. If so, please check **Version 2** of this manual on [www.PyleAudio.com](http://www.PyleAudio.com).

1. Start by flipping over the laptop surface. You should see a set of four holes.

2. Lay the support plate on top, making sure to line up the holes on the plate to the holes on the laptop surface.

3. Insert a washer into each of the four screw hole beds, and then screw in each screw.

4. Next, we need to setup the tripod stand. There are two knobs. Loosen **knob (a)** to raise the height of the stand. Loosen **knob (b)** to open up the tripod base. Tighten these knobs when you have found the appropriate setting.

5. To attach the laptop surface to the tripod stand, unscrew the knob on the support plate, place on the tripod stand, and then tighten the knob. You're done!
