ENJOY THE MOMENT

Low Temperature For Cold Beverages:

Get your beverages as cold as possible without freezing -- this unit reaches temperatures as low as

33°F

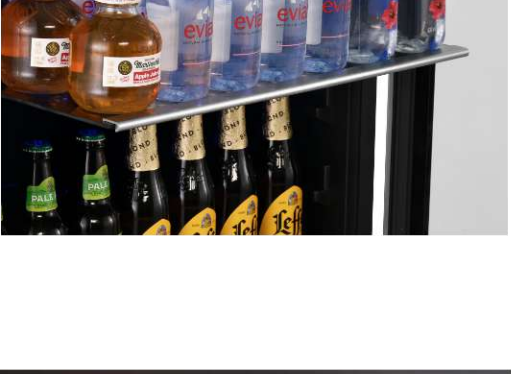

Temperature Range For Reds, Whites or Champagnes:

Provides **33°F - 72°F** temperature

range to preserve all of your collections.

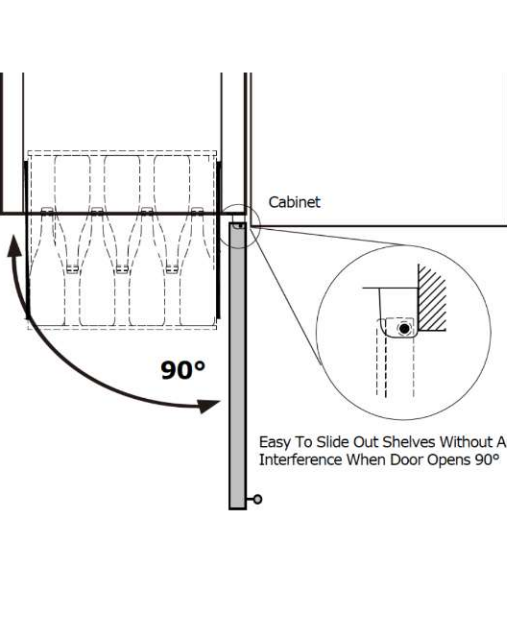

NO DETAIL IS TOO SMALL

Effortless Shelves

Expertly designed to deliver unmatched functionality with a premium style. Each shelf slides out effortlessly for unencumbered access to your wines.

Designed Shelf and Cooling Zone to Store California, French or Italian Wine Bottles

Diligently designed wine shelves will fit bottles from 3 to 3 3/8. Bottom compartment will even fit 3 1/2 bottles perfectly.

Adjustable and Removable Glass Shelves

The glass shelves hold beverages of various sizes even oversized bottles. Plenty of spaces and flexibility to fit beverages for your lifestyle.

Flush Installation

A perfectionist? Our professionally designed zero clearance hinge allows the door to open unobstructed without interference with the adjacent cabinet.

No more half way out shelves, no more protruded appliances

Dual-Pane Low-e Glass Door Preserve Your Wine Collections

Low-E glass helps prevent exposure of wines from damaging ultraviolet rays. This also minimizes energy costs, as it reduces the amount of cooling energy required to maintain the desired wine cellar environment.

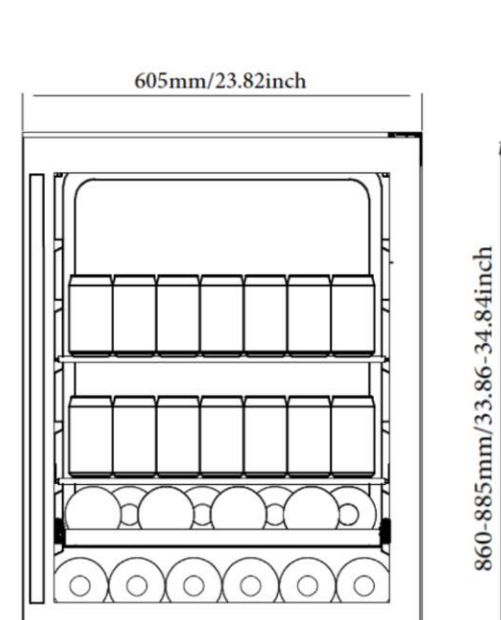

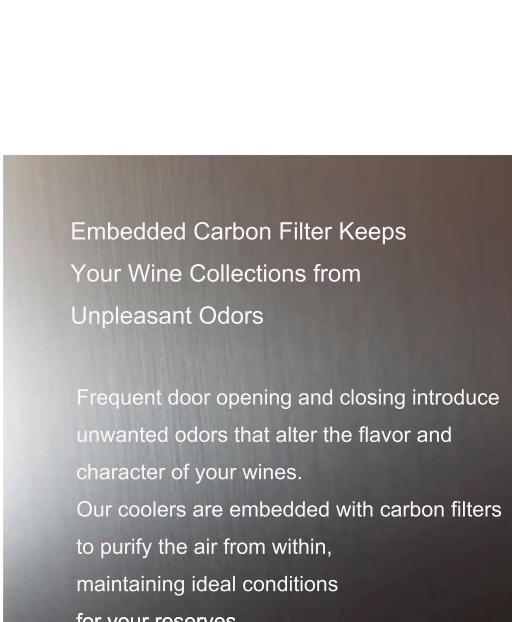

Light Up Your Collection in Cloud White, Deep Blue or Warm Amber

Our premium wine cooler is designed with three color LED lighting in cloud white, deep blue and warm amber. Easily adjust lighting to create the right moods for a lively party or a quiet romantic night.

Smart Temperature Memory System Provides Stable Temperature Control Provides

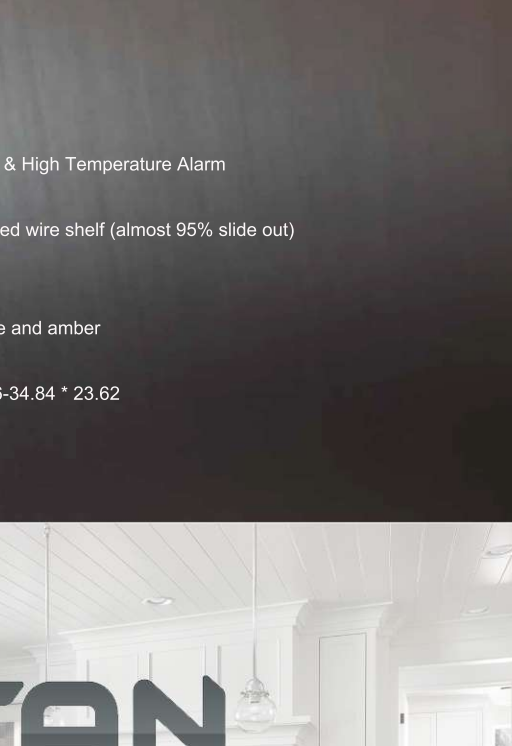

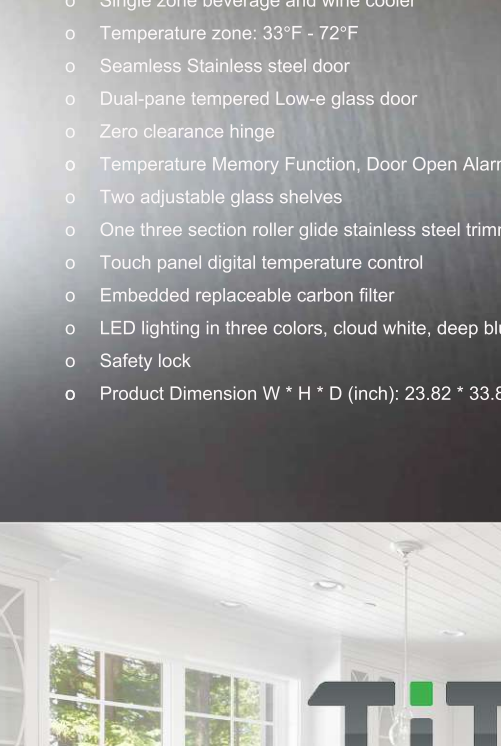

Automatically brings the cooler back to its prior temperature after power restart, protecting your wine from heat damage. A door alarm chimes in case the door is left ajar or temperature rises above the optimal levels.

Embedded Carbon Filter Keeps Your Wine Collections from Unpleasant Odors

Frequent door opening and closing introduce unwanted odors that alter the flavor and character of your wines. Our coolers are embedded with carbon filters to purify the air from within, maintaining ideal conditions for your reserves.
