WHAT'S INCLUDED

Top Pot Spout

1x

Fountain Base
(LED lights pre-installed)

1x

Back Door

1x

Pump

1x

Transformer

1x

FEATURES

Flowing water adds a soothing sound to any environment

Made of durable, weather-resistant Polystone

LED lights in the basin of this fountain are long-lasting, energy-efficient, and create a stunning nighttime display

SPECIFICATIONS

Power Requirements..... Standard Household 120V
Water Capacity.....9.77 Gallons / 37 Liters
Tubing Diameter..... 0.5" I.D.

ASSEMBLING & USING YOUR PRODUCT

Unpack all components carefully. Please check to ensure all parts have been removed from the packaging. **Some splashing may occur when the product is in use.*

1. Place the Fountain Base on a smooth and level surface. Attach the Top Pot Spout to the top of the Base, feeding the tubing into the hole on top of the Fountain Base. Make sure the pot is snug in the slot and the spout pours into the next pot.

2. Remove the Pump from its packaging and adjust the flow control to the lowest setting to avoid splashing until the fountain is completely assembled.

Alpine Quick Tip #1

Turn adjuster counter-clockwise to increase water flow. Turn it clockwise to decrease water flow.

3. Pull the vinyl tubing from the Top Pot through the back opening of the Fountain Base. Push the connector on the pump into the tubing. Place the Pump on the bottom of the reservoir inside the Fountain Base.

4. Pull the LED light cord through the back opening. Plug it into the Transformer and screw down the cover over the connectors until it is tight.

5. Without splashing, gently pour water into the fountain. Using distilled water prevents scale build-up. Do not allow the water to overflow! Make sure the water completely covers the Pump.

NOTE: *We recommend that you use distilled water to prevent scale build-up. The first time you operate the pump it can take up to 5 minutes for the air to be completely expelled and water begins to flow properly*

6. Plug the Transformer and the plug from the Pump into your local power supply. Make sure that there is no water around the plug and always keep the power source in a dry place.

7. You can now adjust the water pump to your flow preference. (see Quick Tip #1) Once set, install the Back Door Cover by sliding it into the designated opening.

Alpine Quick Tip #2

Make sure your pump and light cords are tucked neatly into the cord slot.

8. Congratulations, your fountain is now complete. Don't forget to add water regularly as water will evaporate over time.

Relax and enjoy your new fountain.

REPLACEMENT PART

For parts or additional help with your new product, please contact Alpine Customer Service.

ALSO AVAILABLE FROM ALPINE

- Fountain Care FormulaPPL102
Foam and scale remover for indoor and outdoor fountains.
- Americana® UV Acrylic SealerRRR106
Provides protective clear coating for all painted surfaces.
- Touch Up Paint KitRTD102
Includes primer, thinner, 7 paint colors, applicator and sealer.

TROUBLESHOOTING

If you have any questions or problems, please contact the retail store where you purchased this fountain.

- **If your pump fails to run**

1. Check the circuit breaker or try a different outlet to make sure the pump is receiving electrical power.
2. Check the pump discharge and tubing for any kinks and/or obstructions.
3. Check for any buildup obstructing the water flow and flush it with a garden hose.
4. Check the rotor by removing the front cover and plate to access the impeller area, then turn the rotor to make sure that it is not jammed or broken.

- **If your pump “spews”**

- Check the water level to make sure the pump is completely submerged and there is enough water in the basin to operate your fountain. Not having enough water will cause your pump to spew.

- **If your pump is making abnormal, loud noises**

1. Disconnect the pump from the electrical power supply and remove the front cover and plate.
2. Carefully grip the impeller and gently pull the impeller/rotor assembly out of the pump housing.
3. Rinse the impeller/rotor assembly and clean the cavity with clean water. If breakage or damage is found, contact your local retailer for parts.

CAUTION

- **Always unplug the pump from the electrical outlet before cleaning or handling it.**
- **Use with clean water only. Do not place the fountain or its parts in any other liquid.**
- **Use with a covered Class A GFCI receptacle with an enclosure that is weatherproof with the attachment plug cap inserted or removed.**
- **Periodically change the water and clean the pump to keep the fountain free of microorganisms.**
- **During freezing weather, or if the fountain will not be used for an extended period, disconnect it and store it in a dry place.**
- **Do not lift, carry, or pull the pump by the power cord.**
- **Do not exceed the maximum voltage and wattage on transformer.**
- **NEVER LET THE PUMP RUN DRY.**

LIMITED WARRANTY INFORMATION

Thank you for choosing an Alpine product! We aim to please with our wide range of products including Fountains, Birdbaths, Statuary, Pond Supplies & More. All of our products are constructed from the highest quality materials. In the event that we have not achieved our usual standard of excellence, we will repair or replace, at our discretion, within the warranty period. A valid proof of purchase, with the purchase date clearly indicated, must be provided. Photos of defective merchandise will also be required to help distinguish the actual cause of the defect. Please read below for a detailed description of warranty coverage.

- **Water Damage**

Alpine products are not manufactured to withstand extreme temperatures. Improper storage that allows water to freeze within a product may cause damage, is considered negligence, and will not be covered under this warranty. The use of "hard water," and/or caustic cleaners, can affect the painted or other finishes. Failure to keep the unit clean, and use of such additives/cleaners, will also void the warranty. Please note: for fountains, it is normal for some splashing to occur and protecting the immediate surfaces is not the responsibility of Alpine Corporation.

- **Paint & Color (Retention and/or Loss)**

The use of water will cause natural erosion to the color. This area can be touched up using standard paint. The paint is designed to protect the entire finish against breakdown of color. As with any product, all finishes with time will gradually fade and discolor. The warranty will only cover against severe or complete fading, within the first year from date of purchase, with the above exclusion.

- **Procedure/Service**

Should a warranty/claim be needed, you should contact the retailer from whom you purchased the product. If that is not an option, you can contact Alpine Corporation at www.alpine4u.com. When contacting Alpine Corporation, you must be prepared to show proof of purchase, provide photographs and any other information needed to validate your claim. This may be necessary to distinguish between a partial or complete replacement of a defective product. The warranty does not cover any items with multiple parts; the warranty will ONLY cover the individual component of the unit/item that may be defective. Replacement parts can be made available to a consumer through the original selling party, or an approved parts retailer. If this is not an option, contact our customer service department. ***Item is covered under two year limited warranty from the date of purchase. If your purchase was after our 30-day grace period, payment information will be requested for shipping charges.***

- **Not Covered Under Warranty**

The limited warranty will NOT cover cases of damages due to:

1. Inadequate care and/or neglect
2. Environmental and/or natural elements
3. Immersion in water, unless specified
4. Improper Installation/Storage and/or Maintenance

This warranty is void if the product has been damaged by accident, misuse, negligence, improper installation and/or modifications have occurred. This includes any and/or all defects arising out of freezing water damage, hard water damage, failure to keep the unit clean and free of harmful additives such as bleach, chlorine, etc.... which affects the paint and/or parts. This warranty also does not cover any additional charges or installation, removal, disposal and/or shipping costs or consequential damage associated with any warranty claim.

NOTES

Purchased your product online?
