HOW TO USE THE DUMBBELLS

Each handle (A) has two permanently attached weight plates and weighs 10 lbs. (4.5 kg).

Each outer weight plate (B) weighs 5 lbs. (2.3 kg). Each handle (A) can hold zero, two, four, six, or eight outer weight plates.

Each inner weight plate (C) weighs 1.25 lbs. (0.6 kg). Each handle (A) can hold two or four inner weight plates.

To select the desired weight plates (B, C), first orient the dumbbell so that the selectors (D) are on top, and **lower the dumbbell straight downward** into the tray.

To select the desired outer weight plates (B), lift a selector (D), slide it until it is aligned with one of the outer weight plates, and then lower it. **Rock the selector from side to side to make sure that it is aligned with one of the outer weight plates and that it is fully inserted.** Repeat this step on the other side of the handle (A). **Always select the same number of outer weight plates on both sides of the handle.**

To select the desired inner weight plates (C), lift a selector (E), slide it to one side to select the +2.5 lbs. setting or slide it to the other side to select the +5 lbs. setting, and then lower it. **Rock the selector from side to side to make sure that it is fully inserted.** Repeat this step on the other side of the handle (A). **Always select the same number of inner weight plates on both sides of the handle.**

To use a dumbbell, **lift it straight upward** off the tray so that any unattached weight plates (B, C) remain in the tray. When you finish using the dumbbell, orient it so that the selectors (D) are on top, and **lower it straight downward** into the tray.

Try selecting several different combinations of weight plates (B, C) until you are familiar with the dumbbells.
