

Thank You

for bringing me home!

Spruce Me Up

I've been in a dark box traveling. Here are some quick tips to get me settled:

- Remove yellow leaves or broked stems.
- If my soil is dry, give me a drink of water.
- Set me in the right light.

PLANT CARE

Lucky Bamboo

Light

I like bright, indirect light where I cast a strong shadow at least a couple of hours a day, but don't mind low light.

Water

I don't want my roots to stay wet, so water me as the surface of the potting soil starts to dry.

Food

I don't need a lot of fertilizer, so you can feed me once or twice in spring and/or summer. You can feed me more often if you want me to grow faster.

Features

My twisted stems and easy-growing nature makes me a super popular houseplant, especially with beginners.

Growing tips

I prefer average to above-average relative humidity levels. Repot me every year or two, as my roots fill at least 75% of the pot.

Give me friends! I play well with:

Peace Lily , Bromeliad, Anthurium
