HERE'S HOW TO TAKE CARE OF ME

Cacti & Succulents

LIGHT

I grow best in a bright, sunny spot. I prefer at least six hours of indirect sun a day. The more light you can provide me, the better.

WATER

I like to be kept dry, I may only need watering once every two weeks. If in doubt, its best to stay on the drier side.

FOOD

Feed me once or twice a year during Spring and Summer with a fertilizer formulated for houseplants.

FEATURES

I am drought-tolerant and slow growing.

GROWING TIPS

If cacti or succulents receive too little light, they may lean toward the light. Cacti & succulents have small root systems so they don't need repotting very often.

GIVE ME FRIENDS

(I play well with)

Snake plants, ZZ Plant, or other Cacti & Succulents
