

Mini PestChaser[®] with Nightlight

Instructions

1. Plug the Mini PestChaser into the lower socket of a 110V-AC wall outlet. The ideal placement for the Mini PestChaser is close to the entrance of the room. We recommend using one Mini PestChaser per average size room. The Mini PestChaser is ideal for kitchens, living rooms, dining rooms, or bedrooms because of its mini size and discreet design.
2. The nightlight will illuminate showing the unit is functioning properly and provides a soft glow in the dark.
3. Clear all surrounding objects away from the Mini PestChaser. The ultrasound emitted from the Mini PestChaser does not travel through walls, furniture, cabinets, or any other object.
4. Then, just sit back, relax and forget. Reduction in rodent activity should occur within 6-10 days.
