

User manual

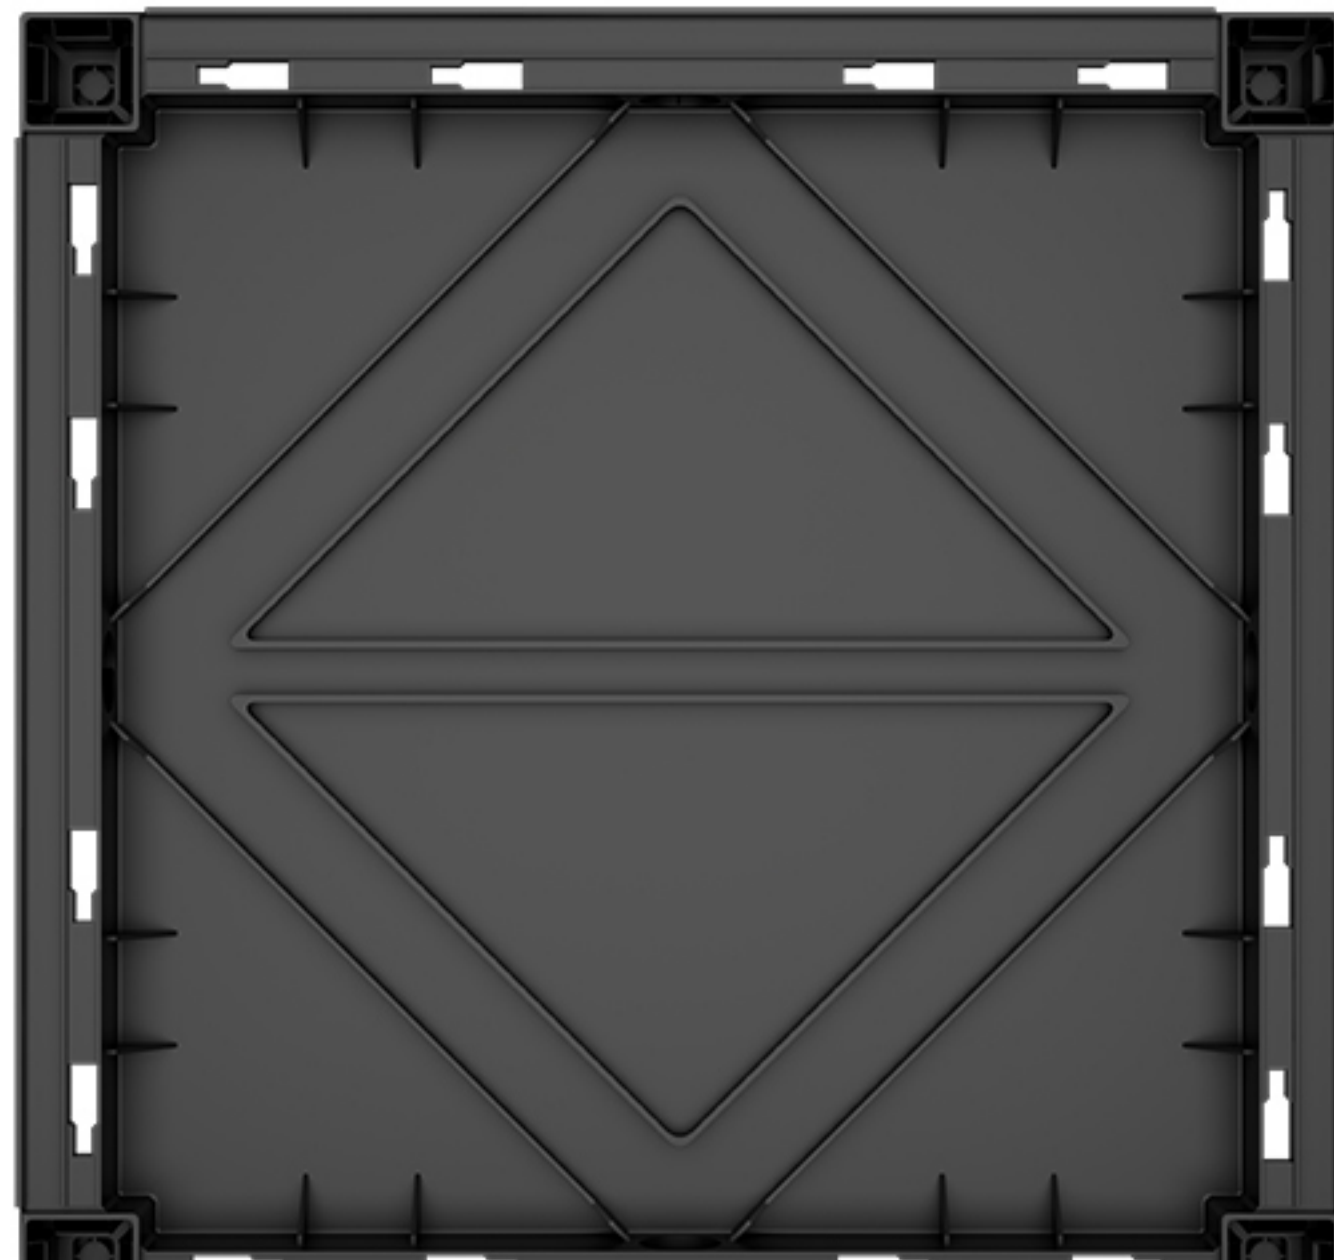

PARTS

1. Lateral plate*16

2. Waterproof plate*3

3. Base plate*3

4. Waterproof strip*12

5. Drain Plug*12

6. Protecting cap*12

7. Upright*36

8. Reinforcing strip*2

1

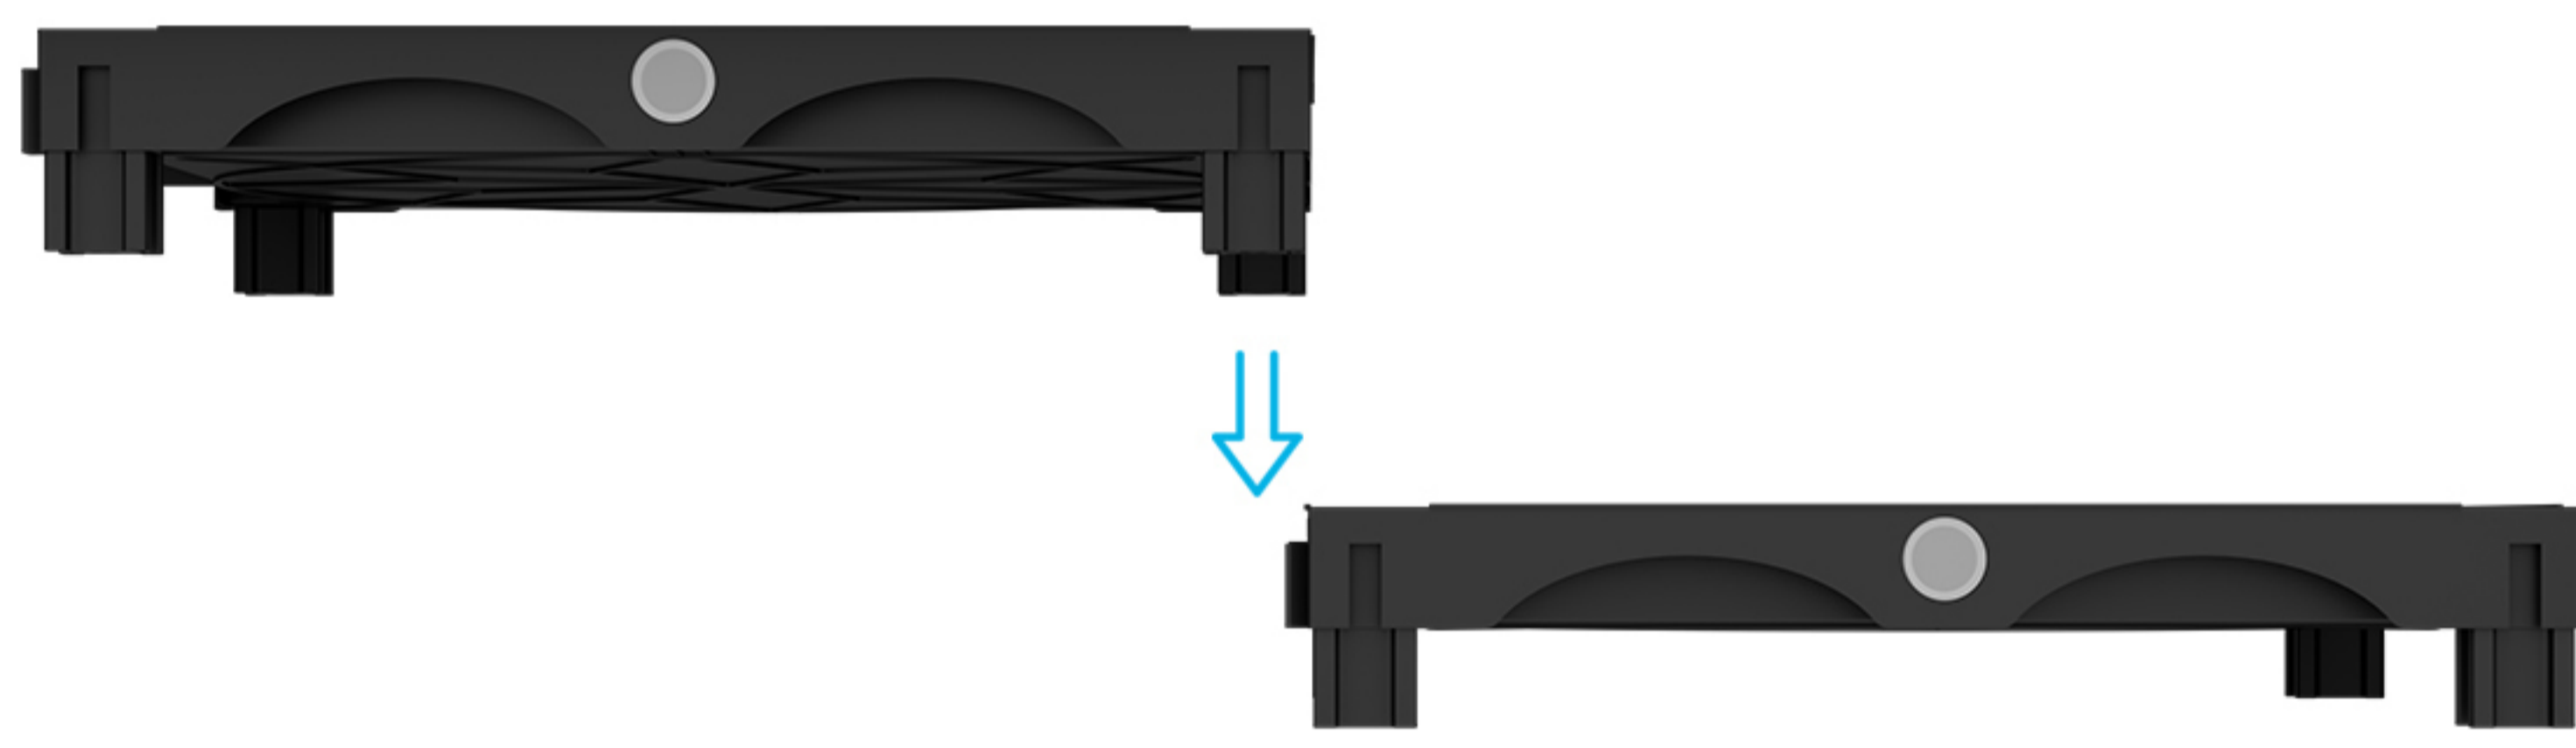

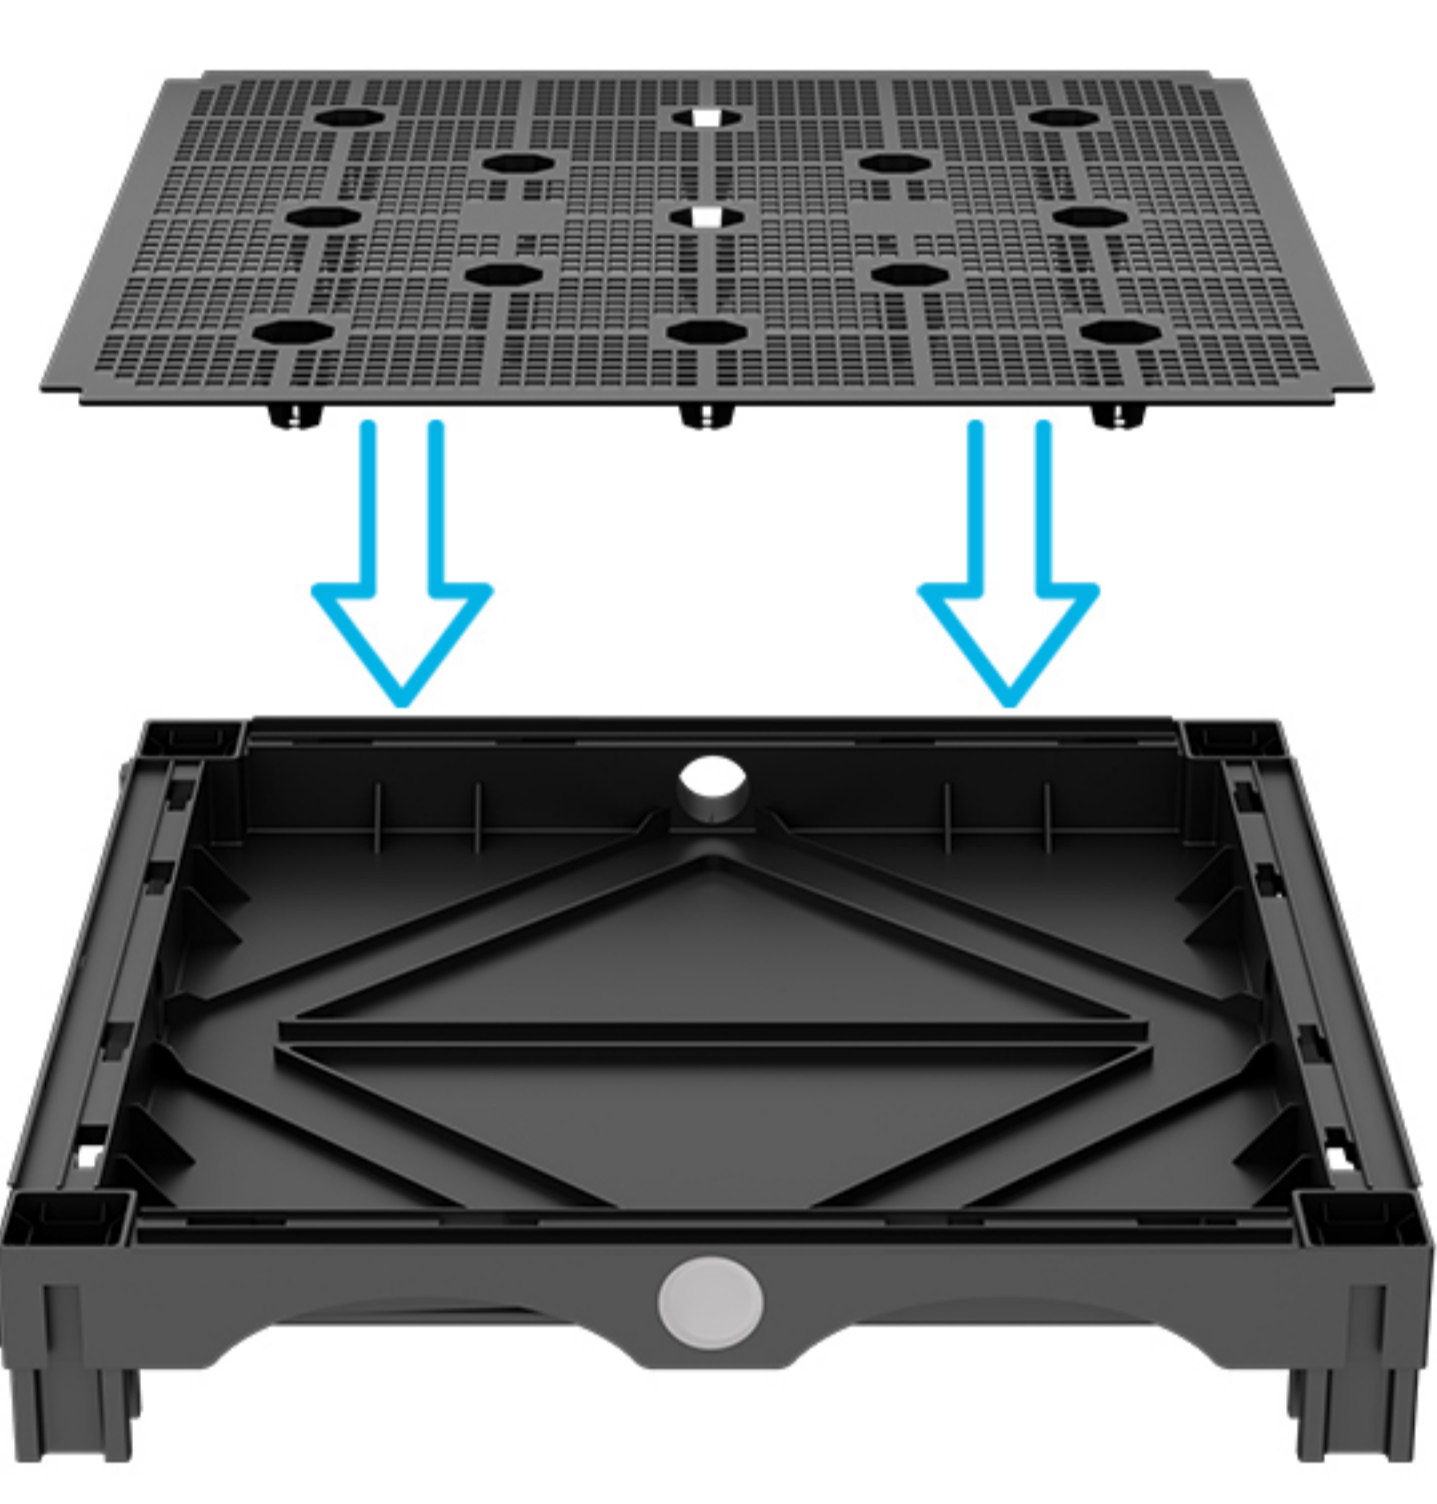

Install the Drain Plug

Open the accessory bag, take out the white water stopper, and install it into the drainage hole at the base.

2

Attach the Bases

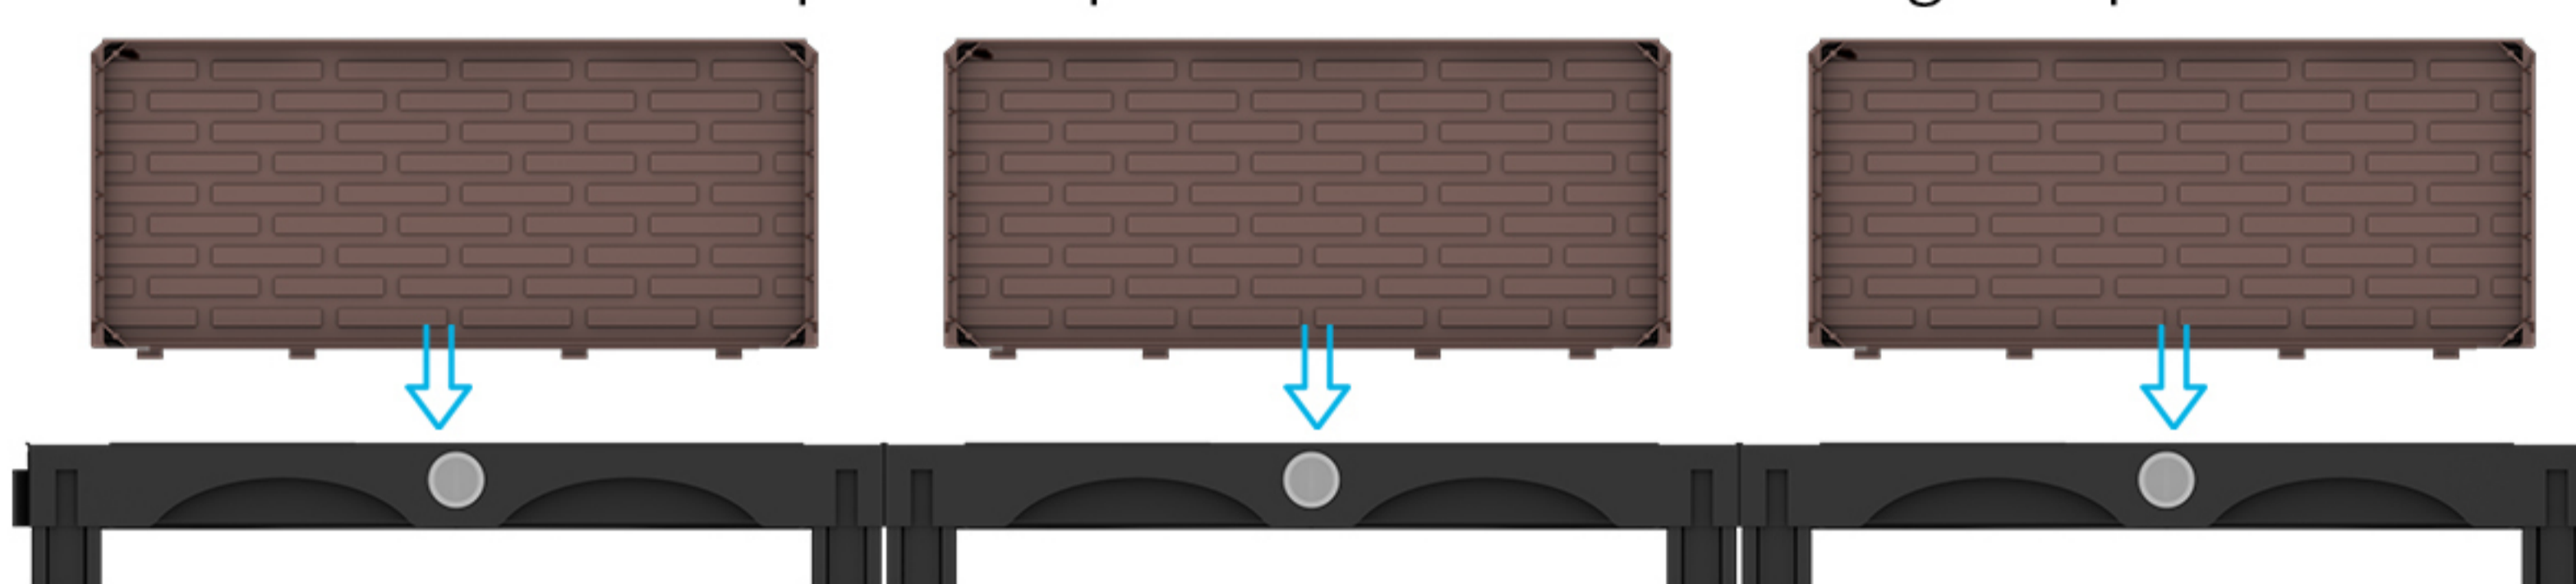

Place the base with the edge on top, and the base without the edge below. Align the clasps and press together until secured.

3

Install Side Panels

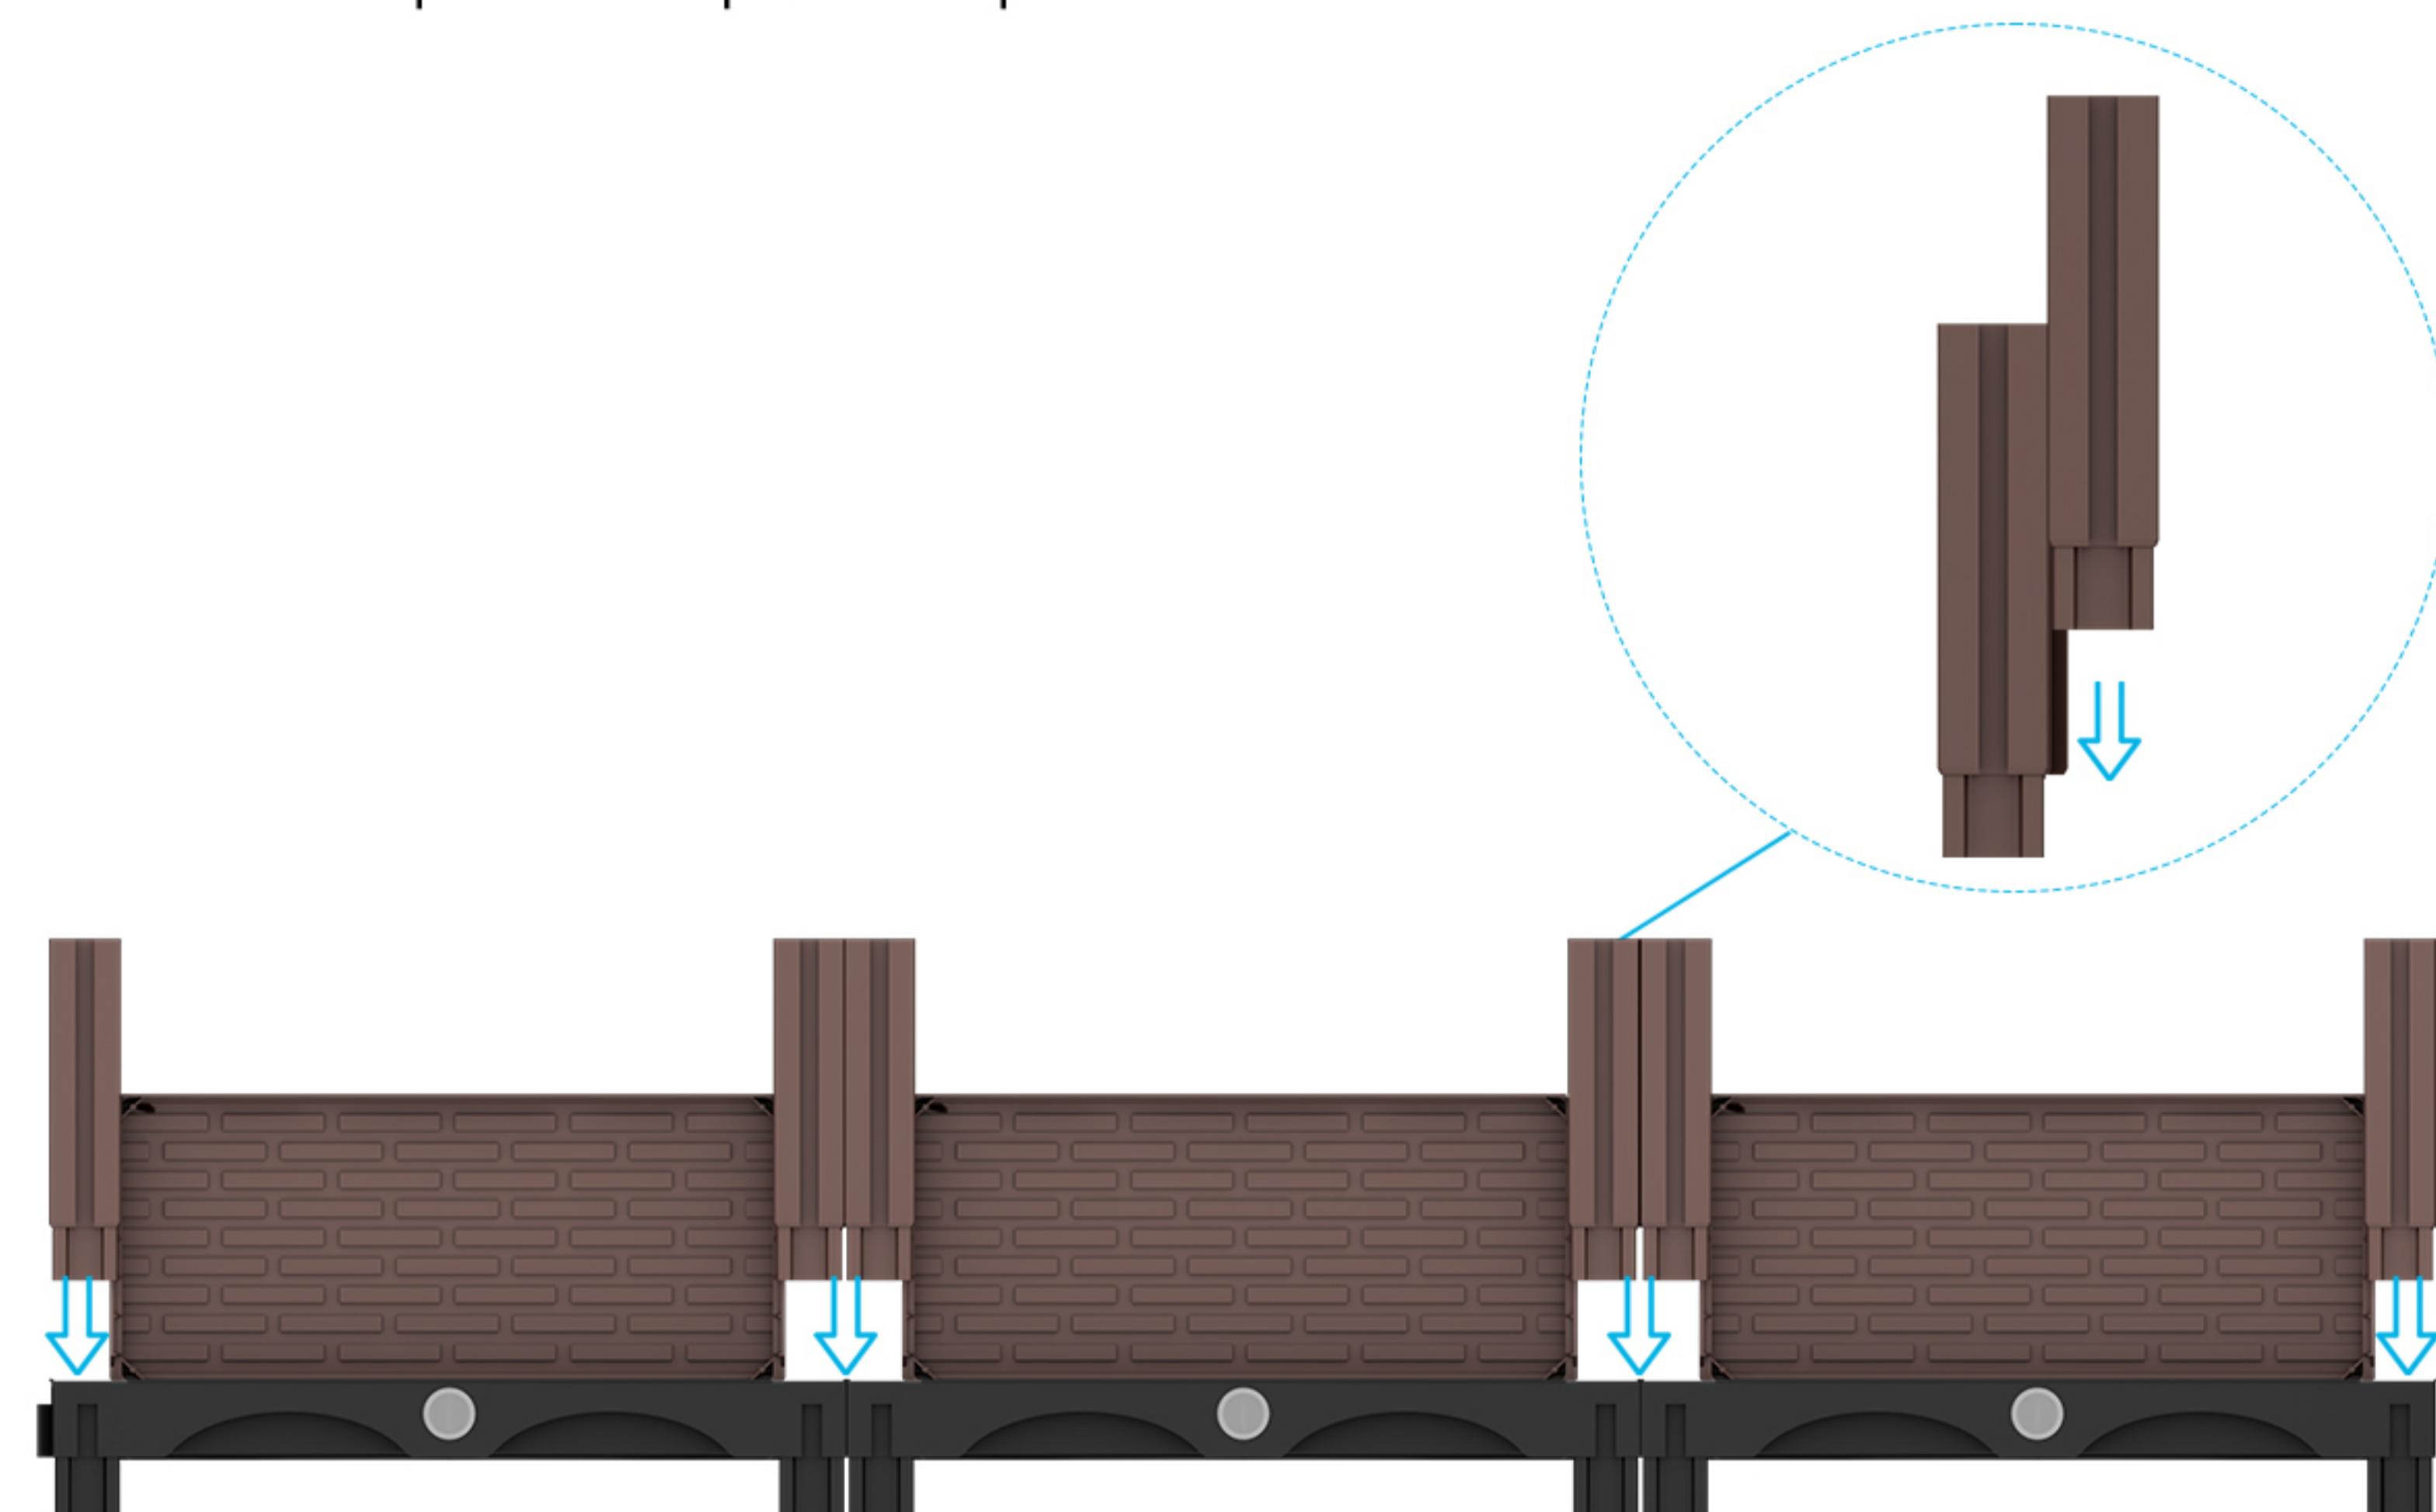

Align the side panel clasps with the slots on the base. Press down and push in one side to secure. Repeat this process for each remaining side panel.

4

Attach Columns

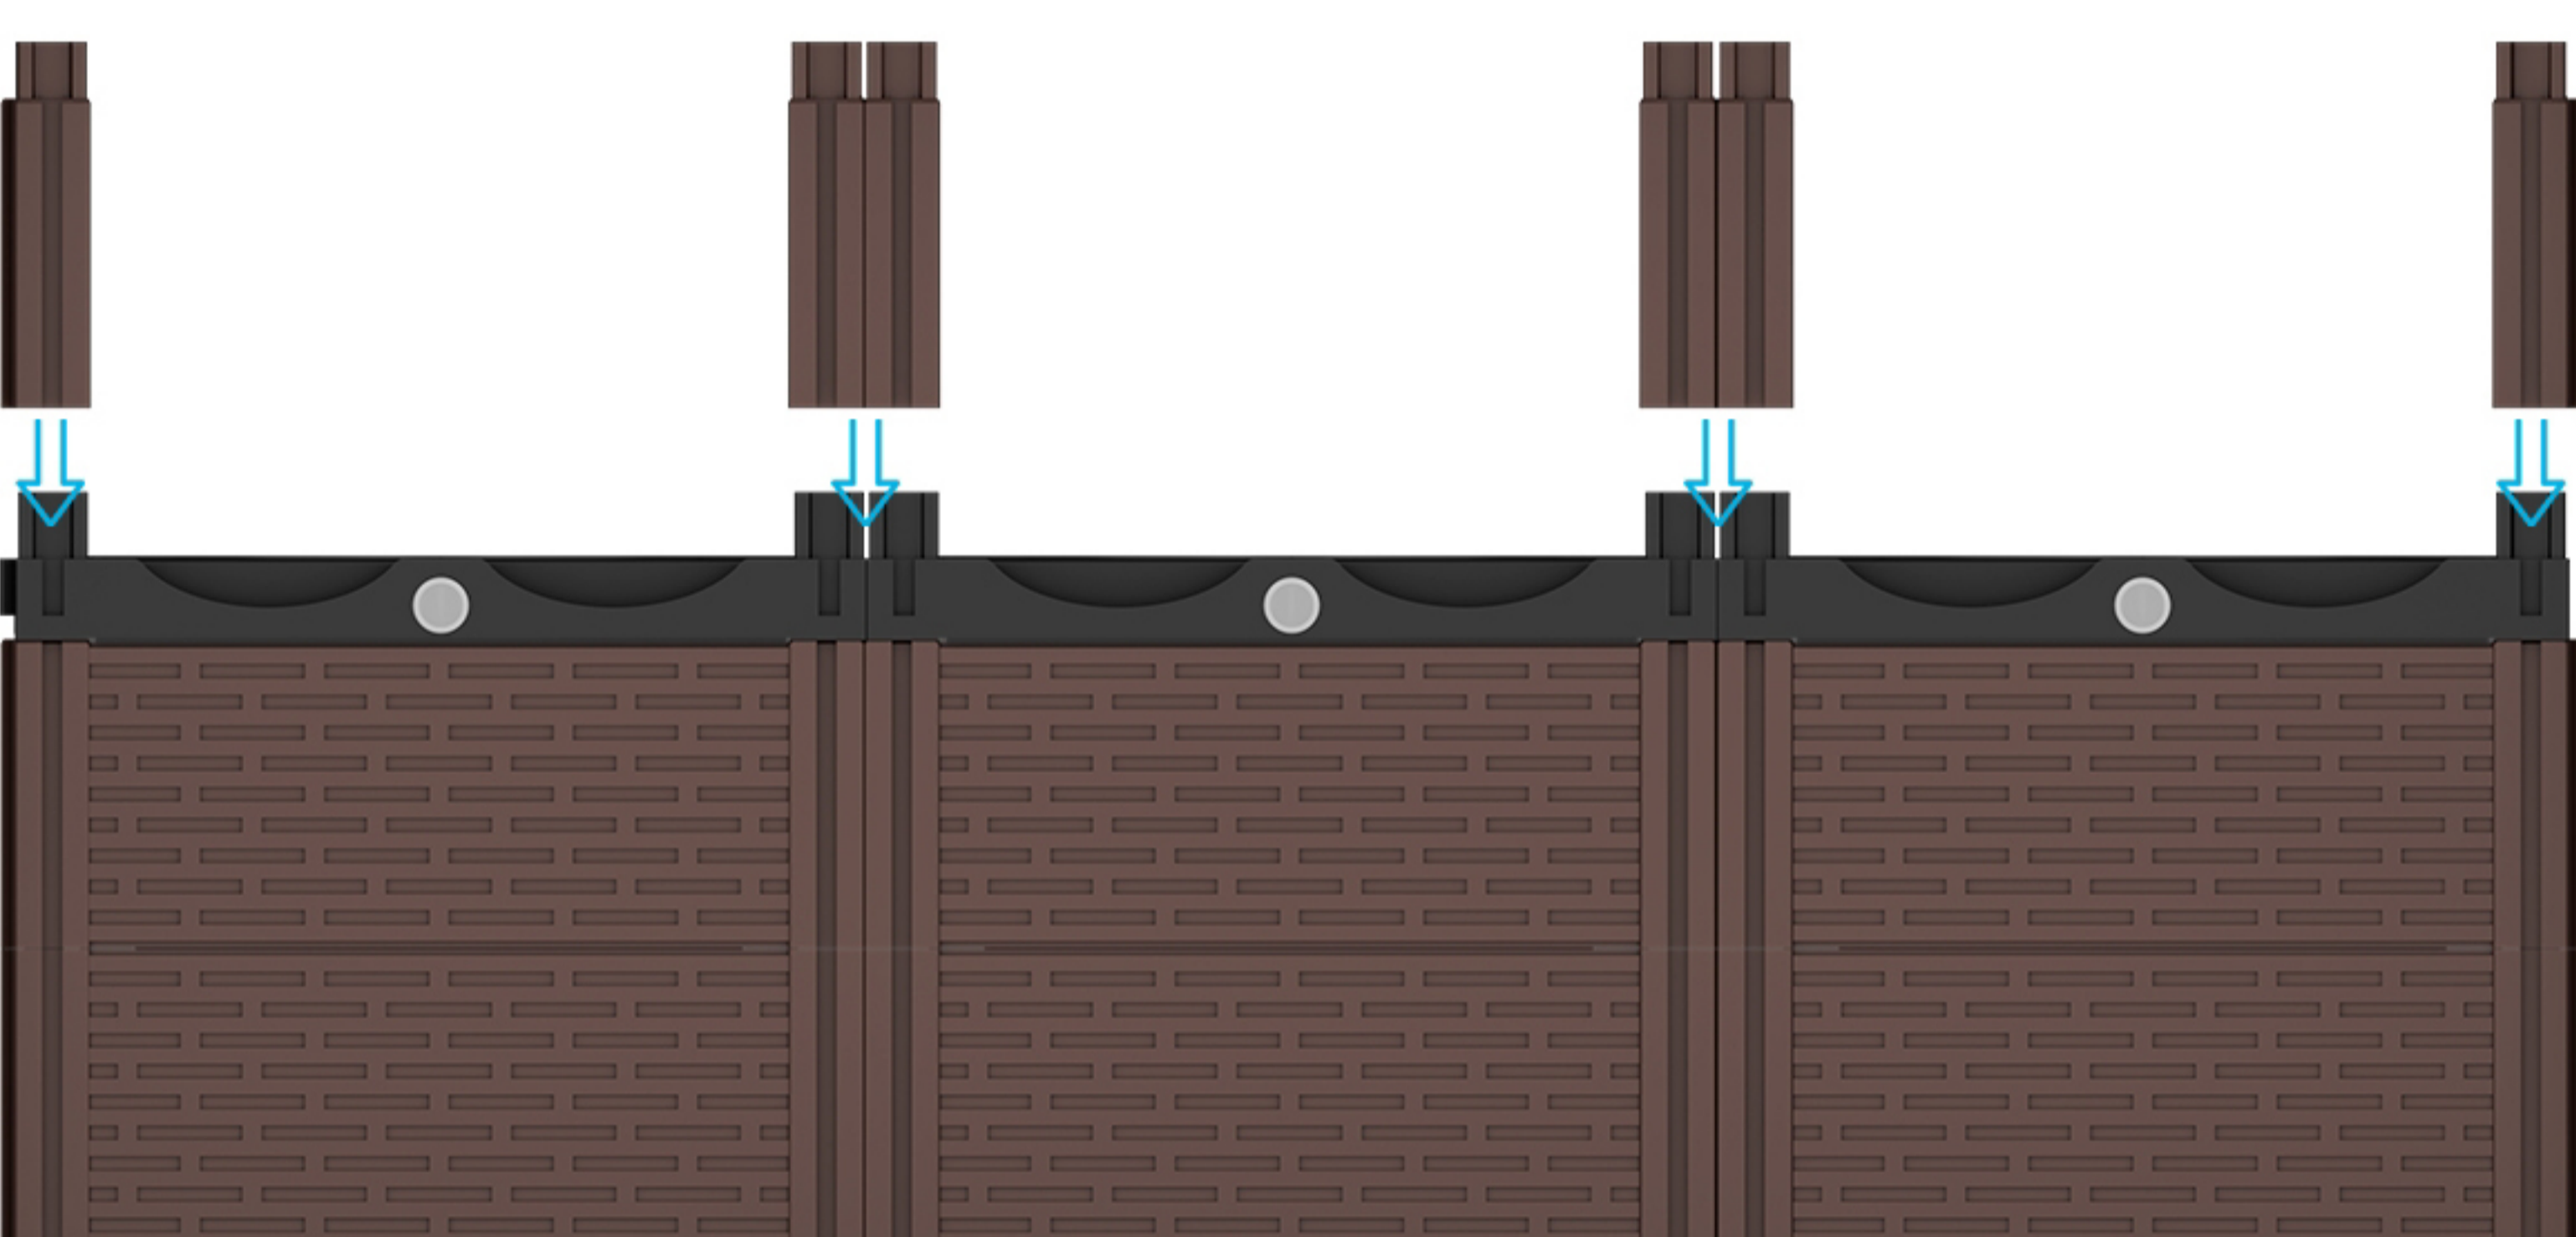

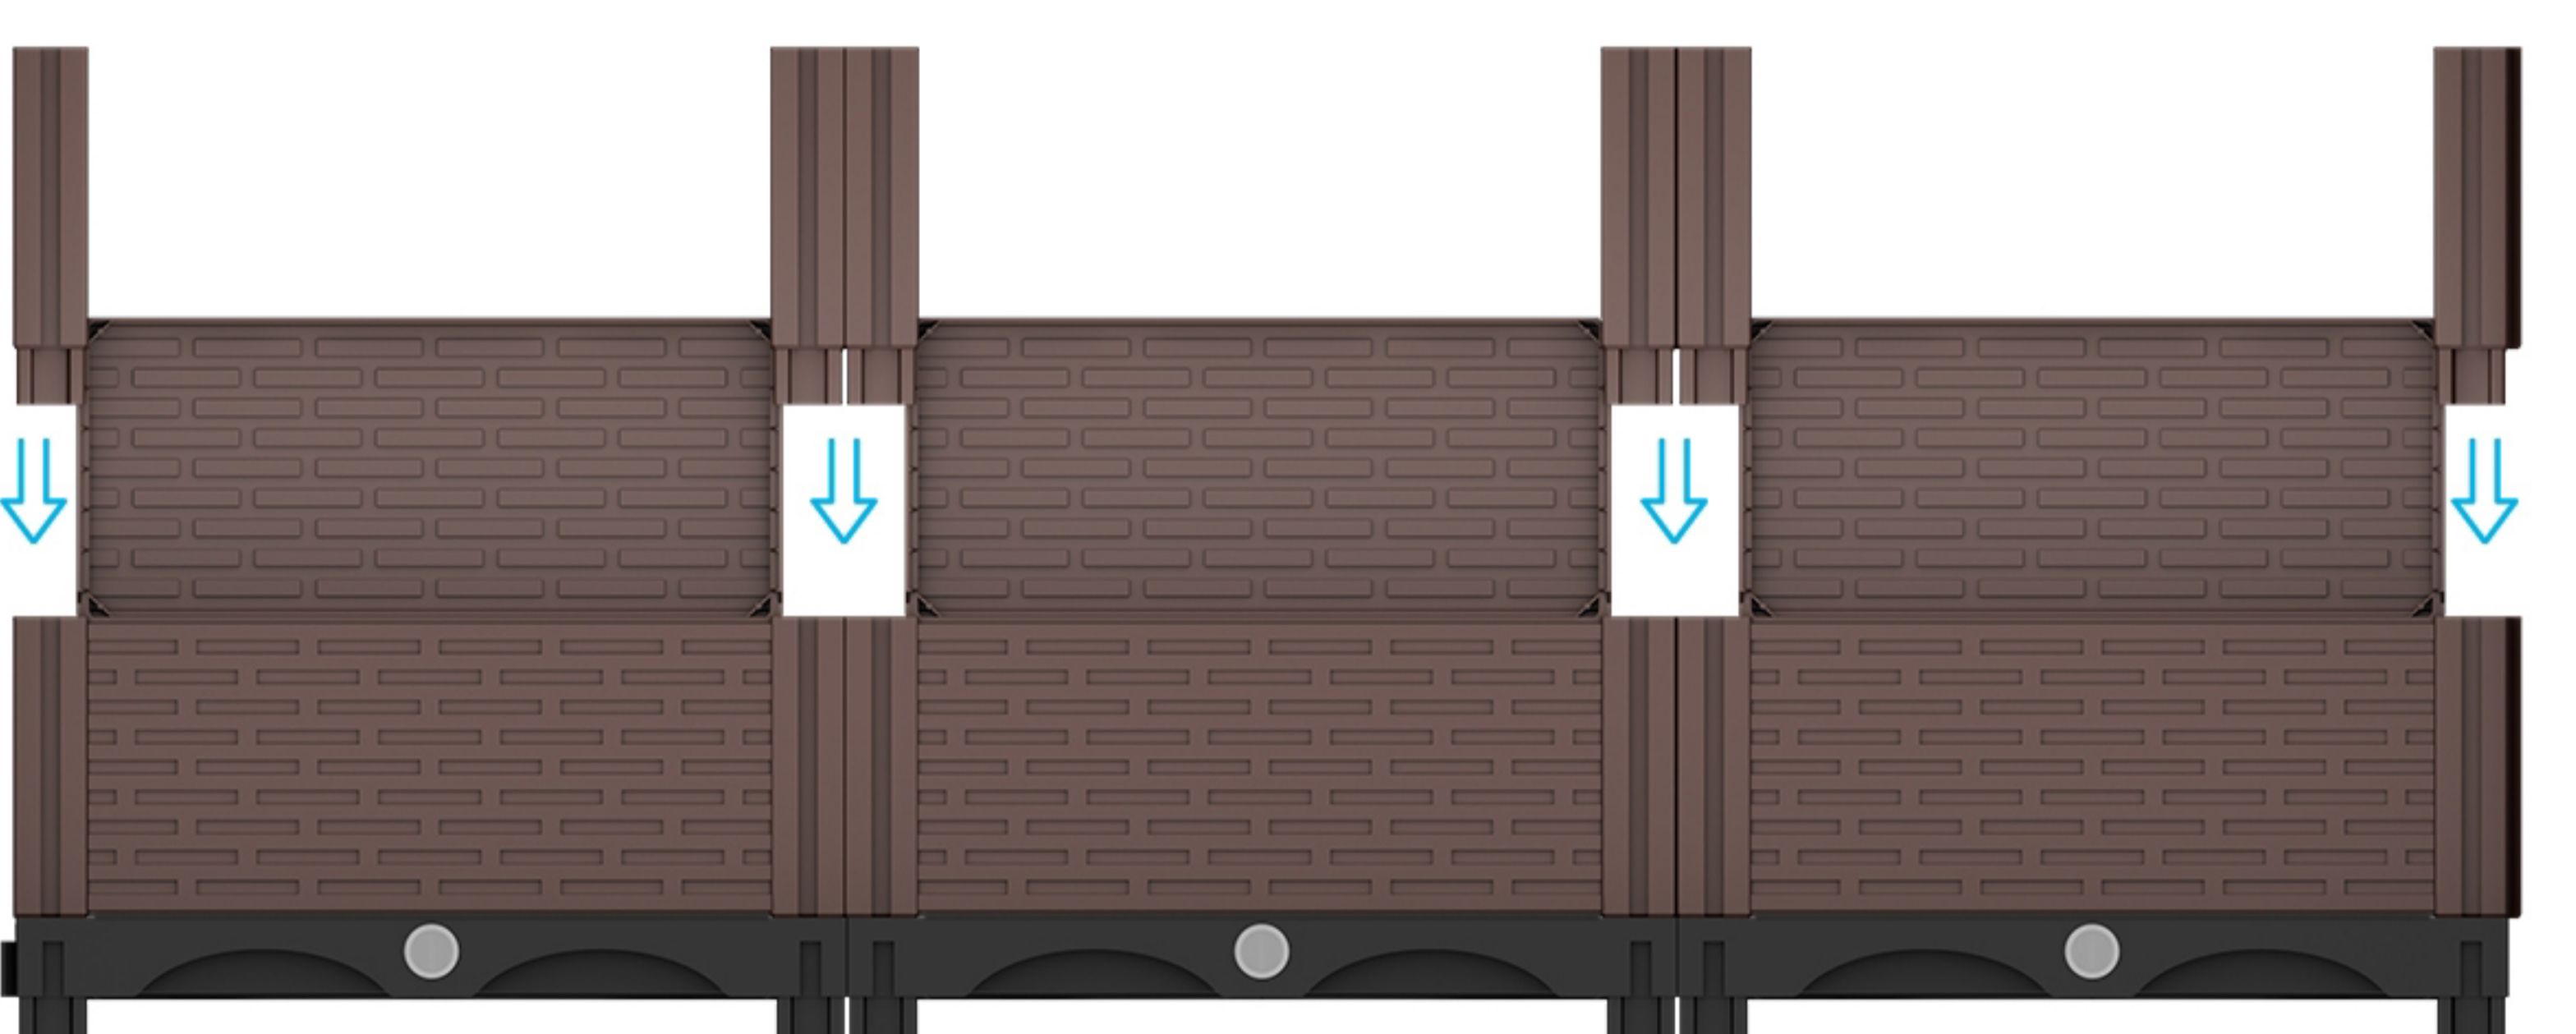

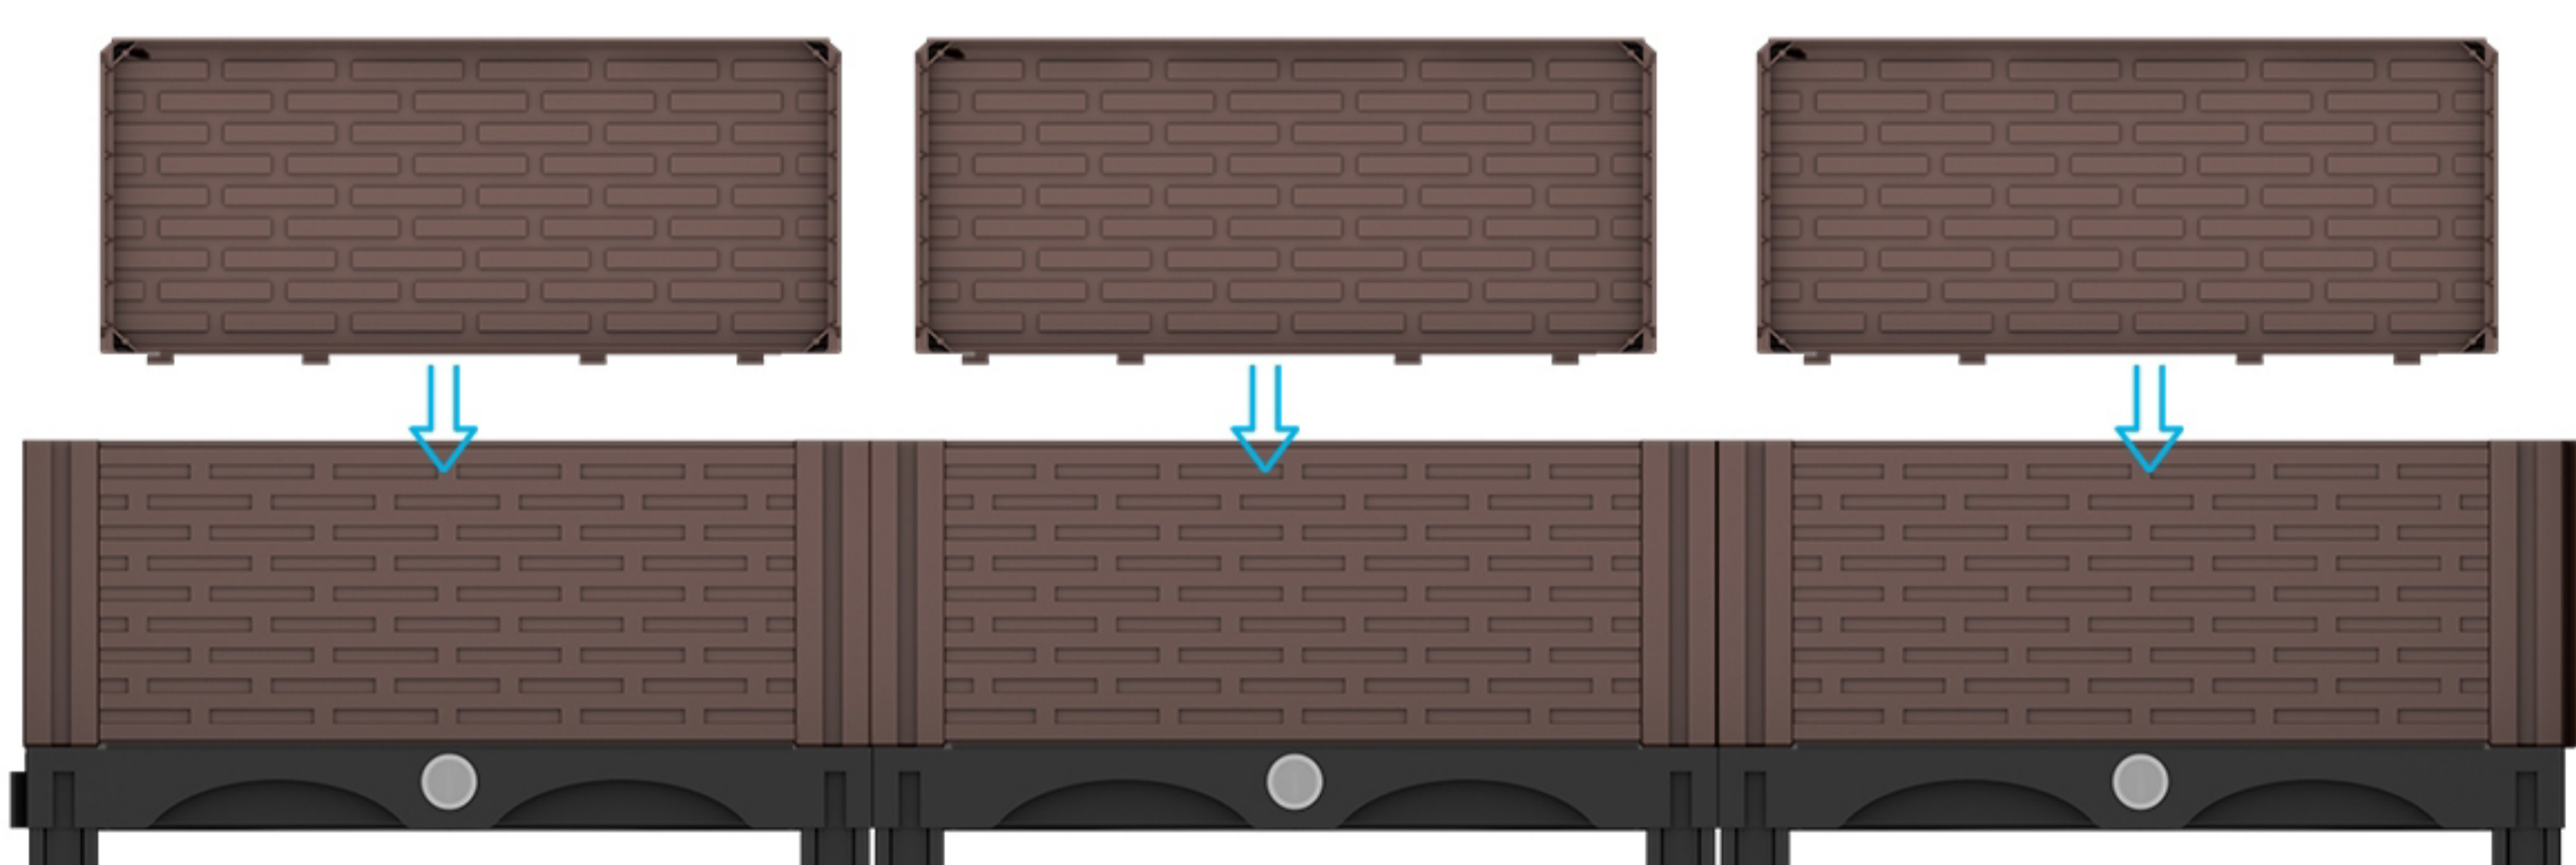

When connecting two side panels, first align the column, then secure it to both side panels. Repeat this process for each column.

5

Second floor installation

Repeat the operation of the third step and the fourth part, and install them in turn.

6

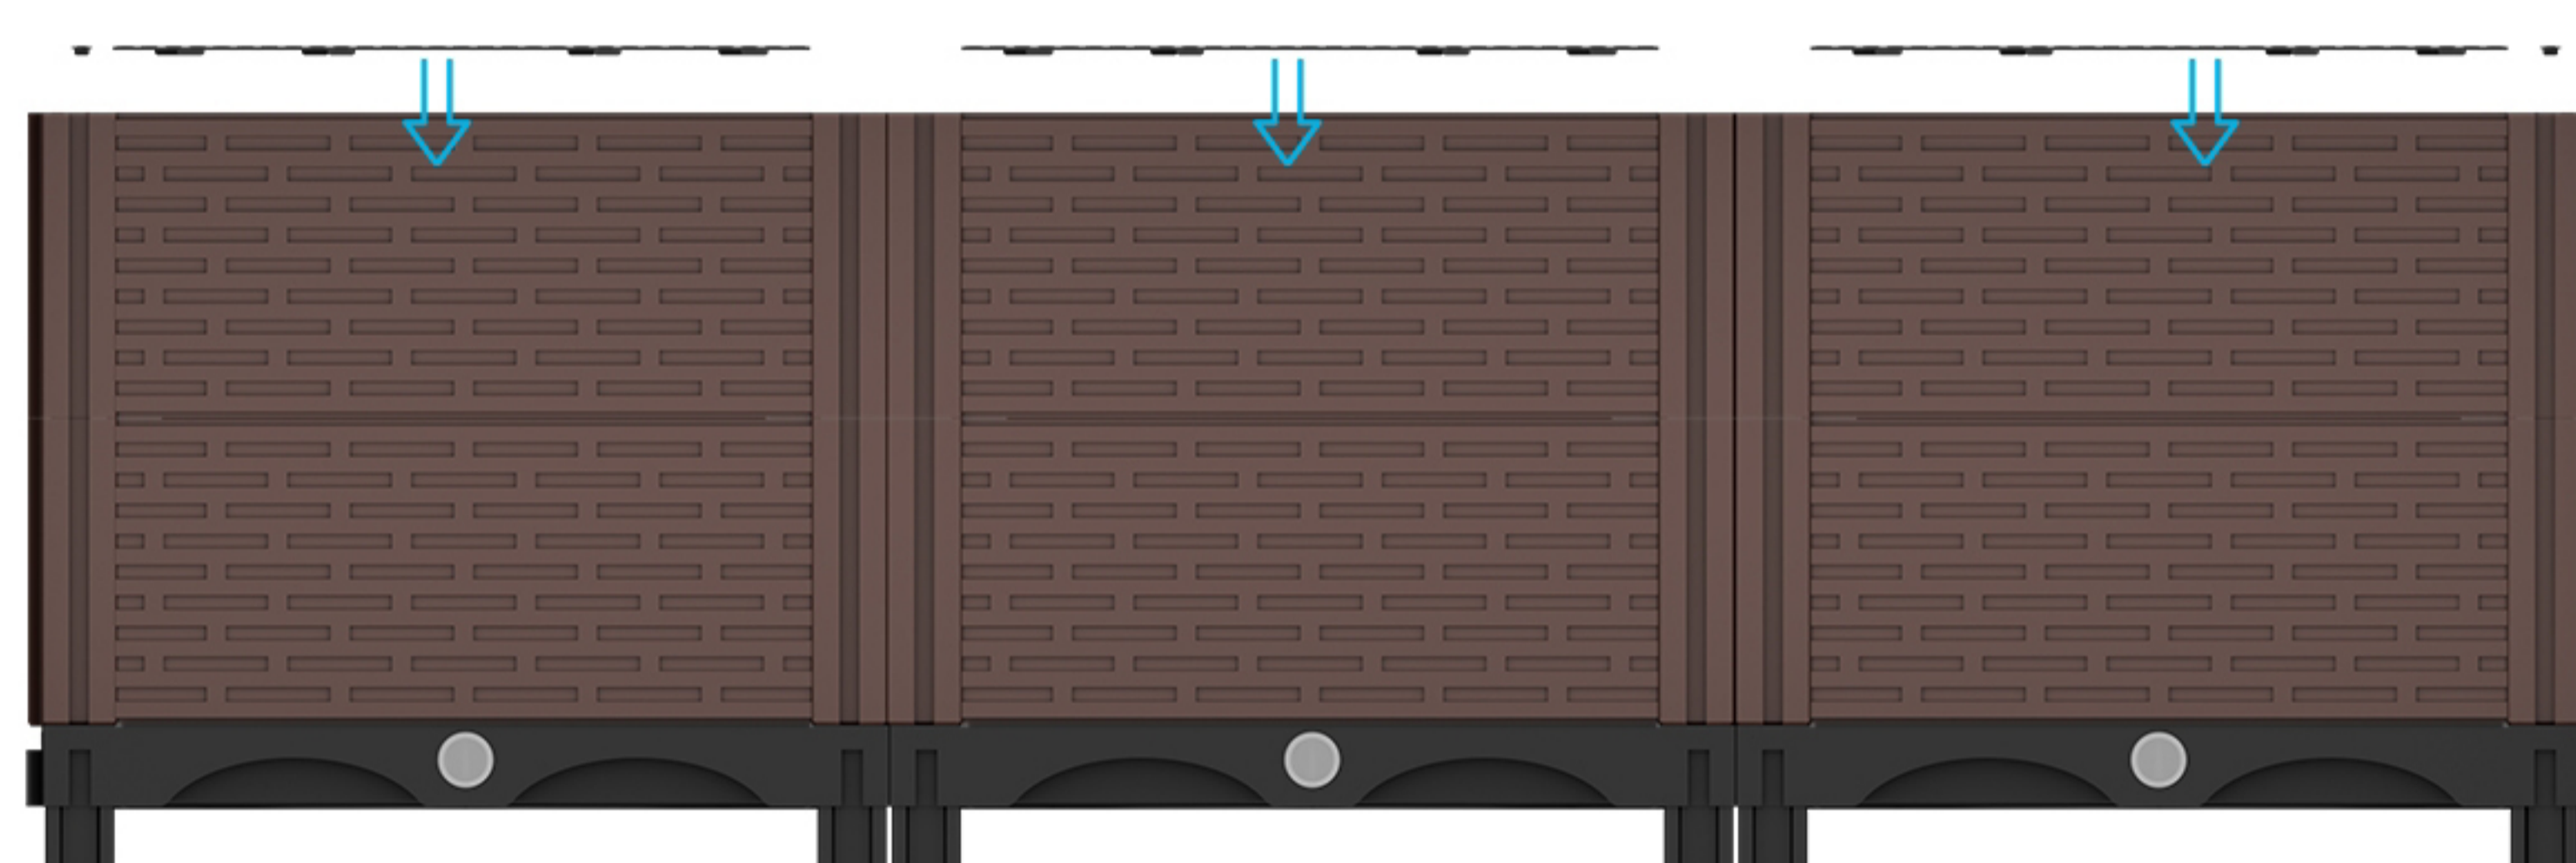

Flip and Attach Columns

Turn the product upside down and continue attaching columns by aligning and pressing them into place one at a time.

7

Install the Waterproof Strips

Align the waterproof strips with the slots on the side panels. Press each clip into place, one at a time, until fully secured. Repeat for the remaining strips.

8

Install Reinforcement Bars

Attach the reinforcement bars to provide additional stability.

9

Attach the Protective Cover

Following the correct sequence, place the protective cover over the columns.
