

Quick Start Assembly/Installation Instructions
CLEARSTREAM™ JUICE™ PLUS

Before beginning assembly, make sure all parts needed are present.

The ClearStream JUICE PLUS comes with:

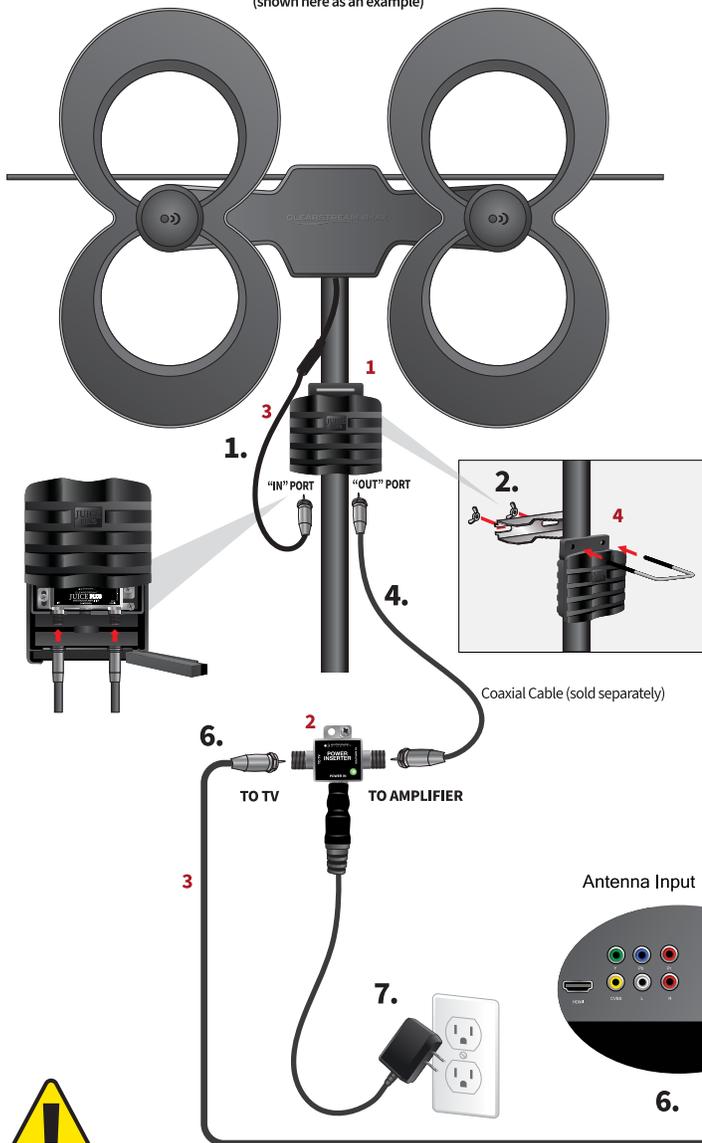

- 1) Juice Plus UHF/VHF/FM Pre-amplifier with Weatherproof Housing
- 2) Low-Loss Power Inserter with LED Light, Power Supply, and Grounding Screw
- 3) 2 – 3 ft. Weatherproof Coaxial Cables
- 4) All-weather Mounting Hardware

INSTALLATION INSTRUCTIONS:

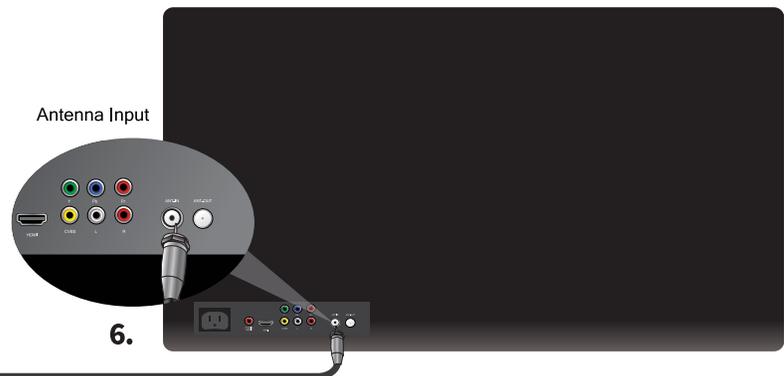

Note: If your antenna is already installed, disconnect the existing coaxial cable between your antenna and the TV/converter box.

1. Connect one of the 3 ft. Coaxial Cables (3) to the antenna as shown (the antenna may look different, but the cable connection will be the same).
2. Using the included Mounting Hardware (4), attach the Juice Plus (1) to the antenna mast below the antenna as shown.

CLEARSTREAM 4MAX HDTV ANTENNA
 (shown here as an example)

3. Slide the front panel UP on the housing to reveal the preamplifier as shown. Open the cable restraint arm and tilt the preamplifier UP to connect the other end of the 3 ft. Coaxial Cable (3) to the “IN” port.
 4. Attach a coaxial cable (sold separately – length of coaxial cable is determined by your installation requirements) between the “OUT” port on the Juice Plus (1) and the “TO AMP” connector on the Power Inserter (2).
 5. Close the cable restraint arm and the front panel to the housing.
 6. Attach the other 3 ft. Coaxial Cable (3) to the port labeled “TO TV” on the Power Inserter (2). Then, connect the other end of the 3 ft. Coaxial Cable (3) to your TV/converter box.
- Note:** The Power Inserter sends power up the coaxial cable to the Juice Plus. The Power Inserter can be located anywhere near the TV. You can use a longer coaxial cable to place the Power Inserter in a different location.
7. Plug the Power Supply (2) into a wall outlet or power strip. The green LED light on the Power Inserter will be illuminated when powered.

Warning! Keep Away from Power Lines.

NOTE: The National Electrical Code includes the requirements for grounding antenna systems in Article 810. Please consult the NEC, a local licensed electrician, or a local electrical inspector for details.

TV RECEPTION CAN BE AFFECTED BY OBSTRUCTIONS OR DISTANCE BETWEEN YOUR HOME AND BROADCAST TOWERS.

Amplifier Regulatory Notice: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this device.

This equipment has been tested and found to comply with the limits for a Class B Digital Device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communication. However, there is no guarantee interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the antenna.
2. Increase the separation between the equipment and converter box.
3. Connect the equipment into an outlet on a different circuit from which the converter box is connected.
4. Consult the dealer or an experienced radio/TV technician for help.
