

Van Zyverden's **CANNAS PICASSO**

As flamboyant as their tropical American ancestry, cannas are among the most colorful summer bulbs with ruffled spikes tapering to refined buds, boasting immense, paddle shaped leaves. Their great reedy canes and palmy foliage make for large, magnificent plants, yielding blooms all summer long for long lasting curb appeal. They are deer resistant and appear most dramatic when grouped in masses. These are fast growers with large flowers.

*Exotic tropical foliage
and color*

*Good in garden beds
or larger containers*

*Easy to grow
and low maintenance*

About This Variety: Canna Picasso puts on a dramatic display of color, with its large leopard-like flower clusters (yellow - with red spots) and their dark leaves creating that exotic tropical feel. The stalks are erect and contrast the leaves. Mass together to create that curb appeal. As a dwarf variety it is shorter growing then most cannas, which is preferred by some. Award winning choice.

Growing Instructions: Where not hardy, plant outdoors in early summer 2" deep, setting the rhizome in the hole, 'eyes' (shoots) up. Cannas do best with a good supply of water.

Care Tip: As flowers fade, deadhead to promote continued flowering. They like moist conditions.

Exposure: Full sun to partial shade

Height: Grows 30-36" tall

Spacing: Plant 18-24" apart, 2-4" deep

Hardy in: USDA zones 3-10

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
