

Instructions for Wet Location Surface Mounted Fixtures

A silicone based caulking must be used to form a water tight seal around the back of the fixture before installing.

Fixture Installation

Make sure that electrical power is off to the electrical box before proceeding.

Clean hands before touching fixture.

- ☐ Mount bracket bar to outlet box and thread nipple to center of bracket bar.
- ☐ Attach white wire of fixture to the white wire from the outlet box using a properly sized wire connector.
- ☐ Repeat process for the black wires.
- ☐ Attach bare ground wire and ground wire from outlet box to the green grounding screw on bracket bar.
- ☐ Place center hole of fixture over nipple and fasten with cap.
