Feed-Thru Modular Plugs

- Feed-Thru modular plugs simplify twisted pair assembly process
- Verify conductor order before crimping
- Conductors trimmed to the correct length by the tool - no measuring
- Connectors for CAT5e and CAT6
- Eliminates wasted connectors due to incorrect assembly
- Single-piece design

MODULAR PLUG TERMINATIONS

The IDEAL Feed-Thru RJ-45 Modular Plugs and FT-45™ Crimping Tool are designed to simplify and improve the consistency of cable to connector termination of CAT5e and CAT6 modular plugs to twisted pair cables. Anyone who has assembled traditional standard or multi-piece modular plugs knows it is a time consuming and often error-prone process.

This system makes it **SIMPLE**

- No more wasted materials
- No more wasted labor
- No sleds or liners

As **SIMPLE** as:

- Align wires
- Insert into connector
- Verify wire order
- FT-45™ Tool does the rest

Feed-Thru Instructions:

Remove 1-1/2 in. of jacket.

Remove center spline (CAT6).

Untwist pairs to jacket base, and align in order. Trim ends flat.

Slide cable into connector until fully seated. Verify wiring order.

Place assembly into FT-45 tool. Squeeze handle closed

DONE
