

# Plant Care Tips

Blushing Bride Air Plant

*Tillandsia ionantha*

## Sunlight

Display in medium to bright, indirect sunlight, or in a place they will receive at least 8 hours of medium to bright artificial light.

## Water

Mist plants with water once a week. Plants do not like to sit in a wet base, and are sensitive to sitting moisture. Plants will begin to dull in color if they become overly dry.

## Climate

Air plants tolerate a wide range of temperatures from 60 - 80°F. Do not allow them to freeze and keep away from air conditioning and heating vents.

## Soil

Plants will survive without any fertilizing; however, you can mist or soak with a solution of balanced houseplant food at a quarter recommended strength once a month during the growing season.

# Plant Story

## Blushing Bride Air Plant

*Tillandsia ionantha*

Known for their beautiful foliage and striking violet, red and pink coloured blooms giving it its name.

*Tillandsia*, are tropical and subtropical plants that have adapted to life in trees or other substrates. These plants acquire their moisture and most nutrients from the air and rainfall. If temperatures and hours of sunlight are kept similar to their native habitats, they will display brilliant flowers once a year.
