**PREPARATION:** Use a cleaner/degreaser prior to applying driveway patches and coating to surfaces. All dirt, oil stains, and chemilcals must be removed for proper adhesion of driveway repair products and sealers. Rinse areas thoroughly with water leaving no puddles. Surface must be dry before applying. Remove loose/flaking material prior to application.

**APPLICATION:** Apply on a clear sunny day when surface temperature is 65°F and rising and no rain is expected for 24 hours. Cut tip to desired opening. Using caulking gun, squeeze material into crack. After material has cured, you may apply a premium Black Jack driveway sealer. Note: humidity and cool air/surface temperatures may lengthen cure time.
