Foot Cap   Support Cylinder   Seat

Foot Rest   Handle   Screws   Seat Plate

ASSEMBLY INSTRUCTION

For proper assembly, follow the instructions below.

Use an allen wrench to attach the Seat Plate to the underside of the Seat with the provided Screws. Insert the Support Cylinder into the center of the Seat Plate

Place the Foot Cap over the Footrest.

Insert the Support Cylinder into the center hole of the Footrest, and press down FIRMLY.

To raise and lower the Seat, grasp the Handle and pull upward without applying any weight on the Seat. To lower, raise the Handle upward by sitting on the Seat.

To disassemble, turn the stool upside down, and hit the clip on the center of the bottom of the Footrest with a hammer or mallet to disengage the locking mechanism. Then, turn the stool right side up, and lift the Seat upward, pulling the Seat Assembly off of the Footrest.

To separate the Support Cylinder from the Seat, gently strike the Seat Plate with a rubber mallet until the Seat and Support Cylinder have separated.
