  - **Level Installation:** Ensure the vanity is installed on a level surface to prevent shifting or drawer misalignment.
  - **Plumbing Compatibility:** Make sure your plumbing setup is compatible with the vanity's design, especially if it includes U-shaped drawers.
  - **Ventilation:** Install in a well-ventilated bathroom to minimize moisture buildup and prevent long-term damage.
  - **Avoid Excess Weight:** Do not place heavy objects on the sink or countertop edges to avoid cracks or tipping.
- 

## Care & Cleaning Guidelines

### Vanity Surfaces

- **Wipe Regularly:** Use a soft, damp cloth to clean surfaces. Mild soap and water work best.
- **Avoid Harsh Cleaners:** Do not use bleach, ammonia, or abrasive cleaners as they can damage finishes and surfaces.
- **Dry After Cleaning:** Always wipe surfaces dry to prevent water spots, warping, or swelling over time.

## **Laminate & Wood Finishes**

- **Dust Weekly:** Use microfiber cloth to keep surfaces clean and dust-free.
- **Protect the Finish:** Avoid direct sunlight and excessive moisture to maintain the wood or laminate finish's appearance.
- **Handle with Care:** Be gentle with corners and edges to prevent chipping.

## **Sink & Faucet Area**

- **Clean Spills Promptly:** Wipe away standing water or soap buildup from around the sink and faucet to prevent stains or discoloration.
  - **Prevent Water Damage:** Ensure plumbing connections are sealed properly to avoid leaks that could damage the vanity base.
- 

## **Drawer & Hardware Maintenance**

- **Self-Closing Slides:** Keep drawer tracks clean and free from debris for smooth operation.
  - **Lubrication:** Occasionally apply a small amount of silicone-based lubricant to drawer slides if movement becomes stiff.
  - **Handle Tightness:** Check and tighten drawer and door handles regularly to keep them secure.
- 

## **Environment & Seasonal Care**

- **Moisture Control:** Use a bathroom exhaust fan or dehumidifier in humid climates to extend the life of the vanity.
- **Temperature Sensitivity:** Extreme heat or cold may affect wood and laminate finishes—keep your space within normal temperature ranges.
- **Sealants:** For wood vanities, consider applying a protective furniture wax or sealant annually for added durability.
